On the radical cure (without medicine) of urine combined, chemically and mechanically with other valuable fertilizing agents and absorbents.

It is reduced to a pulverized condition, ready for immediate use, and without loss of its highly nitrogenous fertilizing properties.

Its universal application to all crops and soils, and its durability and active qualities.

The celebrated author in this admirable es say clearly demonstrates, from a thirty year say creatly cumoustrates, from a turny years successful practice, that the alarming consequences of self-abuse may be radically cured without the dargerous use of internal medicine or the application of the knife—pointing out a mode of cure, at once simple, cerain and effectual, by means of which every sufferer.
