ITHE AMERICAN ARTISAN is a journal devoted to fostering the interests of Artisans and Manufacturers, encouraging the gerius of Inventors, and protecting the rights of Patentees. It is published every Wednesday morning, at No. 212 Broadway (corner of Fulton Street), New York, by BROWN, COUMBS & CO., Solicitors of American and

Foreign Patents. Foreign Patents.

The Proprietors of the American Artisan respectfully announce that on May 11, 1864, they issued the first number of that journal; and they confidently believe that, after the public have carefully perused and duly digested its varied and valuable contents, it will be aranimously declared to be more instructive and interesting that any other weekly periodical of similar character published in either the United States or Europe. During the next twelve months the American Artisan will contain numerous Original Engravings and Descriptions of New Machinery, etc., both American and Foreign—Histories of Famous In entions and Discoveries—Essays on Scientific Subjects—Interesting Letters from working-men in all parts of the world—Instructions in various Arts and Trades-Reliable Recipe for use in the field, the Workshop, and the Household—Wonderful Experiments in Chemistry—Hints to Millers and Millwrights—News-items for Manufacturers—Practical rules for Mechanics and advice to Farmers— Illustrated details of curious and ingenious "Mechanical Movements" and other useful lessons for young Artisans—the Official list of "Claims" of all Patents issued weekly from the United States Patent Office—Reports of Law Cases relating to Patents; the whole forming an Encyclopedia of General Information on a variety of topics connected with the Industrial Arts, the progress of Invention, &c.

THE PUBLISHING DEPARTMENT of the American Artisan will be under the general superintendence of Mr. John W. Coomes, who has nad eleven years' experience in the management of a similar department in the office of the "Scientific American," in this city. Each number of the American Artisan will contain thirty-two columns of instructive and interesting reading matter, in which the progress of the arts and sciences will be recorded in familiar language, divested of dry technicalities and abstruse words and phrases.

THE EDITORIAL DEPARTMENT of the American Arcisan will be critically supervised by a member of the firm of Brown, Coomes & Co., assisted by other gentlemen of theoretical and practical knowledge of the arts and sciences. The columns of the American Artisan will be rendered attractive by articles from the pens of many talented American writers upon scientific and mechanical subjects and spound the personner is the core of the control of the core of the jects; and among the more prominent of these contributors may be mentioned Robert Mac-Farlane, who during the last seenteen years filled the responsible position of Senior Editor of the "Scientific American."

Europe, and who has been for many years the principal professional assistant of Messra. Munn & Co., Patent Agents, of this city. In this department will be published regularly the OFFICIAT list of "claims" of all patents issued from the United States Patent Office issued from the United States Patent United during the previous week; this list will be prepared expressly for the American Artisan, and it will appear several days in advance of its publication in any other journal. Important and interesting level decisions in patent. tant and interesting legal decisions in patent cases, tried in the United States Courts, will be periodically presented in this department, together with illustrated descriptions of many remarkable inventions recently patented either at home or abroad.

TERMS OF SUBSCRIPTION.

Persons, intending to subscribe for the American Artisan should speedily fremit, so as to have their subscriptions commence with the first number of Volume 1, dated May 11, 1864. 'At the end of the year the fifty-two numbers will form, when bound, a handsome volume of 416 pages and several hundred engravings. The terms are only \$2 for One Year; \$1 for Six Months. Club-senders will be very liberally dealt with, as will be seen in the following table:—

The Unibersal Clothes Wringer: "A child can readily wring out a tubfull of clothes in a few minutes. It is really a clothes saver! A Time Saver! The saving of garments will alone pay a large per centage on its cost. We think the machine much more than pays for itself every year in the saving of garments! There are several kinds, nearly alike in general construction, but we consider it important that the Wringer be fitted with Cogs, otherwise a mass of garments may close Cogs, otherwise a mass of garments may clog the rollers, and the rollers upon the crank shaft slip and tear the clothes, or the rubber break loose from the shaft. Our own is one of the first make, and it is as good as new after nearly four years constant use."

Every Wringer with Cog Wheels is war ranted in every particular.
No Wringer can be durable without Cog-wheels

S. C. NORTHROP, Agent. WHAT EVERYBODY KNOWS, viz: That Iron well galvanized will not rust; That a simple machine is better than a com

licated one;
That a Wringer should be self-adjusting, durable, and efficient;
That Thumb-Screws, and Fastenings cause delay and trouble to regulate and keep in order;
That wood soaked in but water will swell,

shrink and split;
That wood bearings for the shaft to run in will mear out:

That the Putnam Wringer, with or without cog-wheels, will not tear the clothes;
That cog-wheel regulators are not essential;
That the Putnam Wringer has all the advantages, and not one of the disadvantages shove named :

That all who have tested it, pronounce it

the best Wringer ever made;
That it will wring anything from a thread to a bed quilt without alteration;
We might fill the paper with testimonials, but insert only a few to convince the skeptical, if such there be; and we say to all, test Putnam's Wringer.
Test it thoroughly with any and all others, and if not entirely satisfactory, return it.

Justly Celebrated Rose Whisky, ALWAYS ON HAND, A very surerior OLD RYE WHISKEY ust received, which is warranted pure.

The All H. D. B. now asks of the public is a careful examination of his stock and prices, which will, he is confident, result in Hotel keepers and others finding it to their ad-

antage to make their purchases from lim-The Patent Conflex Reflector Lantern.

THIS is the most desirable Lantern in the market. It burns Coal Oil without a himney, emitting neither smoke nor smell. It gives a pure white light. It stands quick motions in any direction. The flame is regulated from the outside.

It is neat and compact in form and size. It is free from solder in the upper parts, and is otherwise very substantial in its structure. It has the glass sides so arranged that break age is less likely to occur than in other Lanterns, and in the event of breakage can be easily replaced. It has onvex reflectors which increase greatly the force of the flame, serving

at the same time the purpose of shades to the eyes, which is very desirable.

It is sold lower, with all these advantages, than any Lantern in the market which admits of the flame bring regulated from the outside.

PRICE, ONE DOLLAR.
