DEATH OF FATHER WALDO.—The venerable Father Waldo, of Revolutionary fame, is dead. The Syracuse Courier says: "Ere this item is read this morning, the probability is that the venerable Father Waldo shall have passed from his earthly sojourn to the promised land of the eminently good and virtuous. He is now in his one hundred and second year, and has been rapidly sinking for several days past from an affection of the throat. At our latest accounts last evening, the venerable, and respected steward of God's choice was lying in an insensible stupor, from which there was no hope of arousing him. Even while we indite these few lines his spirit might have passed to its Creator. Father Waldo is one of the twelve survivors of the Revolutionary War, and in his passage from life to eternity, he stands prepared to be garnered, like unto a sheaf of wheat fully ripe."

English officers in India love, to hunt the tiger, and the tiger reciprocating sometimes loves to hunt them. The Bombay Times relates that Captains Wilnot and Dawson had been hunting in the Boondie hills and had killed nine tigers. They were on the point of relinquishing further sport when another tiger sprang upon them, knocked both over, and seizing Wilnot carried him off towards his retreat, treating the unfortunate man as a cat does a rat. He called upon Dawson to fire, which he finally did and killed the animal, but Wilnot was fatally wounded and died that night.

Three Revolutionary heroes were represented by descendants in direct line, and bearing their names, on the Keaysage, in the recent engagement with the Alabama. Judge Matthew Thornton and Josiah Bartlett, signers of the Declaration of Independence, from New Hampshire, represented by great-grandsons, Lieutenant Commander Thornton, and Acting Master's Mate Ezra Bartlett, and the gallant Commodore Preble by Midshipman Preble.—Thus we see those great and good men "still live," and are still at work in endeavoring to preserve that Government whose foundation-stone they helped to lay.

While the rebels were in Maryland, one of their officers, in reply to some interrogatory, remarked, "We take from our northern friends and sympathizers more freely than from Union people because we feel that they would specially desire to contribute to the good cause of the south." The logic is unimpeachable, but it is questionable whether it ally saved the feelings of those who, standing every traitorous act and one of their lives.

The campaign which ended the battle of Chancellorsville, our boys' cotillion parties in the city were well attended by the Union and Secesh. The ladies were very careful they used in the cotillions, that they might not be stepped upon to the ground.

SUICIDE OF AN AGED MAN.—Mr. Ezra Davol, an aged and respectable citizen, was found, yesterday afternoon, lying near the grave of his wife, in the old burying ground, with blood flowing from his nose and mouth. He was immediately conveyed to his residence, and on examination it was found that he had shot himself, the ball passing up through the roof of his mouth into or near the brain. He remained in an unconscious state last night and during the day, and at the time of our going to press he was still alive. Mr. Davol was in his eighty-first year, and has of late, we understand, exhibited some symptoms of mental aberration. He was undoubtedly laboring under some derangement of mind when he committed the sad act.—*Full River News.*

In Germantown, Penna., the other day, some small boys were sitting on the sidewalk near the railroad depot, making a kite; and as they were shaping the paper for it, a citizen passing along that way saw among the covering intended for the sticks a five hundred dollar United States five-twenty bond. He took the bond and went with the boys to their home, and there learned that a woman belonging to the house had found it in the street. She did not know its character, and picked it up because there were pretty pictures upon it. The owner of the bond, living in the neighborhood, had lost it from his pocket, and had returned to the city after it. He recovered his property.

Official reports of European countries have shown more boy-children are born in war than in times of peace, and that although at the end of the wars of the First Napoleon, it was rare to find a Frenchman over five feet three, there was a recuperation in the next age, and now the average height of the men does not vary much from what it was before the Directory.

A SINGULAR CONTEST.—Two gentlemen of high birth, the one a Spaniard and the other a German, having rendered Maximilian II. many services, they each, for recompense, demanded his natural daughter, Helena, in marriage. The Prince, who entertained equal respect for them both, could not give any preference, and after much delay, told them that from claims they both had to his attention and regard, he could not give his assent for either to marry his daughter, and they must decide it by their own prowess and address; but as he did not wish to risk the loss of either or both by suffering them to fight with offensive weapons, he had ordered a large bag to be brought, and he who was successful enough to put his rival into it, should obtain his daughter. This strange combat between two gentlemen was in the presence of the whole imperial court, and lasted half an hour. At length the Spaniard yielded to the German, Andre Ethnarp, the Baron of Tetherd, who, when he had got his adversary into the bag, took him on his back, and placed him at the Emperor's feet, and on the following day married the beautiful Helena.

The Buffalo Medical Journal describes a new disease which has appeared at Cheektawaga, in Erie county, of which several persons have died. It commences with a diarrhoea, and is followed by emaciation till death supervenes. The autopsy revealed the cause of death to be the presence of the worm Trichina spiralis in the striated muscles. The same parasite was also shown in a sausage, of which one of the dead persons had eaten, and with out doubt originated from pork. The worm was probably set free in the process of digestion, and immediately pierced the walls of the intestines, creating the diarrhoea, and passed through the peritoneum into the muscles. It is very tenacious of life, and will resist a strong heat. The parasites were found in the muscles of the dead persons in large numbers. The medical men have no doubt that the use of pork as an article of diet was the cause of the disease. Tapeworm, it is believed, originates in a similar manner.
