Marietta, Saturday. August 13, 1864.

In consequence of the illness of the publisher for the past week, our usual cil ty is very much curtailed this week : we will try to make it up.

we received, a few days since, a copy of a Cuba newspaper from Dr. John J. Sowerby, who is surgeou on board the U.S. steamer "Merrimac," which was in front of Havana on the 25th nl timo. The Dr. in a short note, says:

"We leave this evening in chase of the blockederunner "Matagorda," bound for Galveston, Texas. The "Harrist" Lane," formerly U. S. Gunboat. is at this part and will soon leave as a confed craisec."

V. B. Palmer, of "Advertising Agency" fame, died at his residence in Philadelphia last week.

Lancaster township, the home of the great Buchanan gave a unanimous vote for the soldiers amendment at the recent election. In a cunvass of the township immediately preceeding the election, it was ascertained that two votes were against giving the soldier the right to vote. These were Buchanan and his Irish conclumen. The former being unexpectedly called to a copperhead conclave at Bedford Springe was unable to attend the polls, which the Irish coachman did, but could not muster courage to put in his vote. He left the polls swearing that "Ameriky would be me illigant countbry when the nager would have the right to vote." We hope that the bogtrotter's disobedience of his master's order will not lose him his situation - Lancaster Examiner.

The majority for the soldiers amendment to the Constitution in this county runs up to 8,933, and in the State to ninety thousand!

AN ARMY COOKING WAGON.-The Philadelphia Saturday Evening Post thus describes a cooking wagon presented by a Philadelphian to the United States Christian Commission. It is drawn by two horses. The cooking wagon consists of three boilers for making tea, coffee and soup. From the furnace of each of these boilers a smoke pipe rises, giving the machine the resemblance of a steam fire engine. Each boiler holds fourteen gallons, and is capable, while on the march, with good fuel, of boiling ten gallons each in twenty minutes, and when stationary, they will boil twelve gallons each in the same time, which would be from ninety to one hundred and eight gallons, per hour. The machine is coupled together like a piece of artillery, and can be unlimbered and part of it sent after more provisions or wood, if necessary.

The provision chest, which is on the front part of the wagon, is fitted with japanned cans for holding respectively one hundred pounds of sugar, thirty pounds of ground coffee, twelve pounds of tea, twenty pounds of corn starch, and thirty pounds of beef,

Two tin buckets accompany the ma chine, for the purpose of carrying water, soup, or coffee, to any distant portion of the field; also two gridirons, for toasting bread or broiling meats; and an axe with which to cut wood for the furnaces. Under the wagon is a box, in which the fuel is carried.

The boilers in which the tea and coffee are made contain a perforated strainer, on top, into which the tea or coffee and which prevents the leaves ediment from being drawn off from iquid.

His said enough food can be cooked bes wagon to feed four hundred men e time. It will prove of great use Commission's extensive operations of the Potomac.

That Iron well golvanized will not rust; That a simple machine is better than a complicated one;
That a Wringer should be self-adjusting, durable, and efficient;
That Thumb Screws, and Fastenings cause delay and to ouble to regulate and keep in order; That wood souked in hot water will swell,

shrink and split;
That wood pearings for the shaft to run in will wear out; That the Putnam Wringer, with or without

one-wheels, will not tear the clothes;
in That cog-wheel regulators are not essential;
That the Putham Writiger has all the advantages, and not one of the disadvantages above named;
That all who have tested it, pronounce it the heat Weinger ever made. the best Wringer ever made;
That it will wring anything from a thread

That it with wring anything from a threat to a bed quilt without alteration;
We might fill the paper with testimonials, but insert only a few to convince the skeptical, if such there be; and we say to all, test Putnam's Wringer.
Test it thoroughly with any and All others, and if not entirely is attifactory, return it.

Putnam Manufacturing Co:
Gentlemen: I know from practical experi-

ence that iron well galvanized with zinc will not widtze or trust one particle. The Putnam Wringer is as near perfect as possible, and I can theerfully recommend it to be the best in use.

Respectfully yours.
