I do this more readily in regard to Hoofland's German Bitters, prepared by Dr. C. M. Jackson because I was prejudiced against them for a number of years, under the impression that they were chiefly an alcoholic mixture. I am indebted to my friend Rob't Shoemaker, esq., for the removal of this prejudice by proper tests, and for encouragement to try them, when suffering from great and long debility. The use of three bottles of these bitters, at the beginning of the present year, was followed by evident relief, and restoration to a degree of bodily and mental vigor which 1 had not feit for six months before, and had almost dispair-ed of reganing. I therefore thank God and my friend for directing me to the use of them. J. NEWTON BROWN. Diludelphic Luce 22 1620

than ten months nor more than forty years from their date, and until their redemption FIVE PER CENT. INTEREST WILL BE PAID IN COIN, on Bonds of not over one hundred dollars annually and on all other Bonds semi-annually. The interest is pay-able on the first days of March and September in each year. Subscribers will receive either Registered

or Coupon Bonds, as they may prefer. Reg istered Bonds are recorded on the books of the U. S. Treasurer, and can be transferred only on the owner's order. Coupon Bonds are payable to bearer, and are more convenient for commercial uses.

Subscribers to this loan will have the option of having their Bonds draw interest from March 1st, by paying the accrued interest in coin—(or in United States notes, or the notes of National Banks, adding fifty per cent. for premium) or receive them drawing interest from the date of subscription and deposit. As these Bonds are Exempt from municipal or State taxation.

their value is increased from one to three per cent. per annum, according to the rate of tax levies in various parts of the country.

At the present rate of premium on gold they pay OVER 8 PER CENT. INTEREST,

in currency, and are of equal convenience, as a permanent or temporary investment.

It is believed that no securities offer so great inducements to lenders as the various descriptions of U. S. Bonds. In all other forms of indebtedness, the faith or ability of private parties or stock companies or seperate communities only is pledged for payment, while for the debts of the United States the whole property of the country is holden to tsecure the payment of both principal and inerest in coin.

These bonds may be subscribed for in sums from \$50 up to any magnitude, on the same terms, and are thus made equally available to the smallest lender and the largest capitalist. They can be converted into money at any moment, and the holder will have the benefit of the interest.

It may be useful to state in this connection. that the total Funded Debt of the United States on which interest is payable in gold, on the 3d day of March, 1864, was \$768,965,-000. The interest on this debt for the coming uscal year will be \$45,937,126, while the cus-toms revenue in gold for the current forced it will be seen that even the present gold revenues of the Government are largely in excess of the wants of the Treasury for the

excess of the wants of the Treasury for the payment of the gold interest, while the recent increase of the tariff will doubtless raise the annual receipts from customs on the same mount of importations, to \$150,000,000 per annum.

Instructions to the National Banks acting as loan agents were not issued from the United State Treasury until March 26, but in the first three weeks of April the subscriptions averaged more than TEN MILLIONS A WEEK.

Subscriptions will be received by the First National Bank of Philadelphia, Pa. Second National Bank of Philadelphia, Pa. Third National Bank of Philadeldhia, Pa. BY ALL NATIONAL RANKS.
