Love's Beauty.
The world, the cold and heartless world,
May gaze on thee and see
No trace of beauty, yet thou art
Most beautiful to me;
For that sweet, loving soul of thine,
Which dwells within thy form,
Is like a gushing streamlet pure,
Unspeared by passion's storm;
And innocence and truthfulness,
And virtue, love, and grace,
Are far more precious to my sight
Than beauty of the face.

The New Year.
Joy! Joy! a year is born:
A year to man is given,
For hope, and peace, and love,
For faith, and truth, and heaven.
Though earth be dark with care,
With death and sorrow rife,
Yet toil, and pain, and prayer,
Lead to a higher life.
Behold, the fields are white!
No longer idly stand!
Go forth in love and might;
Man needs thy helping hand.
Thus may each day and year
To prayer and toil be given,
Till man to God draw near,
And earth become like heaven.

Drill for Single Volunteers.
Fall in—Love with some amiable and virtuous young woman on the first opportunity you have.
Attention—Pay to her, assiduously and respectfully.
Right Face—Popping the question like a man, and she'll accept you.
Quick March—To her parents and ask their consent.
Right Turn—With her to the church, and go through the services of holy matrimony.

Half—And reflect seriously for a few moments; then determine to devote yourself entirely to your wife.
Right about Face—From the haunts that you have frequented when single, and prefer your own home.
Advance Arms—To your young wife when out walking together and don't let her walk three or four yards behind you.
Break off—Billiard playing, betting, and staying out at night; if you wish to have a happy home.

Theodore Tilton, the able and accomplished editor of the New York Independent, in a recent lecture, related the following amusing anecdote about Wendell Phillips:—"This distinguished orator was, riding in a railroad car, when he was addressed by a man of great rotundity that he seemed to carry every thing before him. 'This man asked Mr. Phillips what was the subject of his life?' 'To benefit the negro,' was the bland reply. 'Well, then, why don't you go down South to do it?' 'That is worth thinking of. I see a white cravat round your neck; pray, what is the object of your life?' 'To save souls from hell.' 'May I ask you if you propose to go there to do it?'"

From "The Crystal Gem."

Autobiography of a Cat.
I was born in the year 1850, and am now an old and experienced Cat. I will relate a few of my adventures. The first thing I remember was that I was lying in a haymow with three sisters and my mother, a few days after we had our eyes open we began to be very spry, we would romp around in the hay, and bury ourselves in it, and had fine fun, but one day our fun was suddenly stopped, for there appeared a monster over in a part of the hay mow to which our mother had forbidden us to go. He seemed to come up through the floor, and took us so by surprise that we stood spell-bound. I will describe the appearance of this monster; he had a horrible big mouth which looked as if it would swallow up one of our poor little kittens at a moments notice; he had in his mouth two rows of big white teeth and he had such a head full of hair; he had only two legs and there was a queer looking what we called little legs or, as our mother afterwards told us, an arm hanging on each side of his body; I said before, we were very much frightened, but our mother told us not to be afraid for this monster was only a man; but we were still afraid and we had reason to be so, for before my mother knew what he was about, he had snatched up two of my sisters, and carried them off. My mother mourned for her kittens, and so did I and my remaining sister, but we were too young to feel their loss long, so we romped about the hay as usual, but now as we were a month old our mother thought it proper to take us into society. We soon formed very pleasant acquaintances with other cats, and soon our mother allowed us to rattle about in the night. One night three companions and myself were sitting under a tree talking politics when we spied at no very great distance a large dog looking at us, we rushed for the tree and all got up but me. For the dog had seen us running for the tree, and so he had run and just got there in time to catch me. I was very much frightened, and begged for my life but the cold hearted dog would not let me go, but carried me to his house, where he laid me on the straw and sat watching me. His house was pretty big, and as he laid on one side there was quite a wide space between him and the other side, so taking advantage of this passage I started past him and out the door, and before he could get out I was safely lodged in a tree. As he did not know what tree I was on he went to his house again, and I returned in safety to my companions. I have related very few of my adventures, but maybe I can tell you some more another time.

Blackey.
Parson Brownlow thus compares his family record with that of Prentiss of the Louisville Journal:
"My two sons entered the Federal army, and one of them is now at home on crutches, because of wounds received in leading his regiment of cavalry in a charge upon Wheeler's forces in middle Tennessee. My other son is in General Gillem's command, and was in the fight when that great Kentucky horse thief, Morgan, was killed, under whom and with whom your sons have been fighting against the government upon whose bounty their rebel mother and contract hunting father are living. One of your sons was killed in Kentucky while on a horse stealing expedition under rebel officers. Your other son is now on trial in Virginia for the murder of a brother rebel named White. Your wife is an avowed rebel, and ought to be sent South by the Federal authorities; and you are but one degree removed from a rebel and a traitor, having been completely played out."

During the progress of the Oddyke-Weed libel suit in New York on Friday last, Mr. William M. Evans, was in the midst of an eloquent plea for the defendant, when he was interrupted by a Jewish juror, who said that his Sabbath was about to begin and he could not listen any longer. So the Court adjourned to Monday, after a controversy, in which the juror said he would leave at sunset, whether he was fined for contempt or not.

A modern French writer says, "A physician prescribing for a sick man always reminds him of a child snuffing a candle—it is ten to one it snuffs it out."
192,760 migrants arrived at New York port alone, last year.

Coquetry and Retribution.
The south winds blew gently through the branches of the stately old elm and pine trees in the beautiful park owned by Judge Auburn, whose mansion was situated on the outskirts of a beautiful village in the eastern part of Pennsylvania. On that calm, warm evening might have been seen seated in the little summer house in the above mentioned park, with a volume of Tennyson's poems in her lap, beautiful Viola Auburn, Judge Auburn's niece, and the belle and coquette of the village. She was in deep reverie. In fact my pen would fail me if I were to attempt to give to my readers a description of her as she appeared in her evening wrapper. Suffice it to say that her jet black hair, which fell in long curls around her shoulders, her fairy-like form and her winning ways had wrought for her countless admirers. Among the most ardent of these were Eugene Montour and Harry Worthington. Viola was started from the reverie into which she had fallen by a rustling of the bushes on the outside, and the next moment she was face to face with a young lieutenant, Eugene Montour.
"Good evening, darling," he said, taking her proffered hand. "How is my little one?"
"Very well, I thank you. Why, Mr. Montour, you look like the hero of many battles already, with those regimentals on."

"No flattery, darling."
"Indeed, it is not flattery in the least." A few more common-place remarks were made, when Eugene seated himself by her side, and taking her hand in his, said—
"Viola, the train which will carry me to my regiment, a few miles below here, will be due in a few moments, therefore, what I wish to say must be said in a few words. Our regiment leaves the day after to-morrow for Washington, and I could not go away and leave you without once more asking you to be my wife. I have already asked you twice but I will venture it the third time: You little dream how dear you are to me, and what a great pleasure it will be to me to know, while on the battle-field, that when I return it will be to claim you as my bride."
He paused. He saw that she was about to speak, but he interrupted her, saying—
"I fear your answer. If you love me as I love you, you will not blast my future happiness."
Viola rose and, facing him, said—
"Well, Mr. Montour, I may as well be frank with you. I do love you, but I am engaged to another."
How harshly those words grated on the brave young lieutenant's ears, and just as he was going to ask who was his rival, a third party appeared on the scene. "It was Harry Worthington."
"I hope I do not intrude."
"Oh! not in the least. On the contrary, we are glad to see you," she said, advancing and taking his proffered hand.

The two gentlemen were then introduced to each other, and after a few remarks were made about the evening the war, and a few other subjects, Lieutenant Montour wished his companions a good night, left them with a sad heart and downcast spirit, and wended his way to the village depot, there to get on board the train that would carry him to his regiment; but what was his surprise to find that the only occupant of the train, were a few of his fellow officers, who informed him that this train was to carry their regiments southward. The next day found our hero in Washington, awaiting further orders.
Let us return to our heroines, whom we left in company with Harry Worthington.
"Viola," he said, after they had conversed for some time, "tell me what Mr. Montour is to you?"
"Why," she said, with a laugh and a coquettish toss of the head, "we are betrothed to each other."
"Viola, I had long hoped to win your love, and some day to call you my own. I have long loved you, and now that I know that you can be no more to me, the world will be dark at best. Miss Auburn, I hope you will allow me to see you home, as the evening is getting quite dark."
"No; I thank you. I do not wish to put you to so much trouble, and I love to be out after dark by myself."
"Then I will have to bid you good evening, for I have made an engagement that must be fulfilled," he said, rising and taking her hand.

"I hope we part as friends, Mr. Worthington," she said, but "nothing more," so saying, she left her. "So saying," she lifted out of her retreat and started for home. "The handsome lieutenant," he said, "was coming to hunt you."
"Oh! never," she replied. "I have been having a splendid time with my lovers, you know, uncle."
"Yes, I know," he said, as he returned to his library, while Viola passed on to her bed chamber, there to dream of her many lovers.
The following morning, as Judge Auburn was perusing the columns of the village newspaper, his eye caught sight of a paragraph headed "Suicide" and at this point he heard Viola's merry laugh in the garden. Calling her into him, he said—
"Pretence makes no pottage. You were seen when they looked at the little one hat swept the house."
"Women laugh when they see and weep when they hear," said the old man. "You are a woman, like the flowers in the garden, but you are like the stars of the heavens, because you are so bright. You are a woman, because you are so beautiful, without fortune, have sweet hearts plenty, but husbands none at all. Beauty is no inheritance. It dresses the head, and not a thing of the heart. Three women and a goose make a market. There is many a good wife that can't see and does the best of her husband. The society of ladies is a school of politeness. The rich widow cries with one eye and rejoices with the other. He that tells his wife news is but newly married. He who wishes to chastise a fool, gets him a wife, as an ox would howl if he were next to a good wife. No woman is ugly when she is dressed. She that is born a beauty is half-married. She that has an ill-husband shows it in her dress. 'Solomon the wise,' 'a good wife is a good price.' She who is born handsome is born married. Who has a bad wife, has purgatory for a neighbor. The cunning wife makes her husband her apprentice. The more women look in their glasses the less they look to their houses. There is one good wife in the country, and every man thinks he has her."
A Four-Leaf Clover. At the last meeting of the Polytechnic Association, Dr. Rowell played upon the President's table a silver pipe, with four legs. The hinder pair were fully formed, but are not used in walking, being curled up and carried. Dr. Rowell remarked that they seemed to be a part of the President's outfit in a rudimentary condition attached to the rump of the hen. He supposed that the few which hatched from a double yolked egg, which the hen had failed to push out of the nest, was an unusual oversight.

Amusing Proverbs about Women.
As the good man saith, so say we:
As the good woman saith, so must it be.
A little house, well filled, a little land well filled, and a little wife well filled.
All women are good, good for some thing or good for nothing.
An untimely woman, though ugly, is the ornament of the house.
A man of straw is not worth a woman of gold.
A woman's work is never done.
A good wife is the workmanship of a good husband.
When the good man's from home, the good wife's table is soon spread.
A woman's best fortune, or his worst, is a wife.
A woman conceals what she knows, but she shows what she fears.
Every man can tame a shrew, but he shames her.
Ladies will sooner pardon a man of shabby than a woman of shabby dress.
You may know a foolish woman by her angry.
Women are wise, but added fools on promotion.
Choose a wife rather by your ear than your eye.
Many blame the wife for their own foolish life.
Pretence makes no pottage.
While the tall maid's stooping, the little one hath swept the house.
Women laugh when they see and weep when they hear.
Beauty is no inheritance.
It dresses the head, and not a thing of the heart.
Three women and a goose make a market.
There is many a good wife that can't see and does the best of her husband.
The society of ladies is a school of politeness.
The rich widow cries with one eye and rejoices with the other.
He that tells his wife news is but newly married.
He who wishes to chastise a fool, gets him a wife, as an ox would howl if he were next to a good wife.
No woman is ugly when she is dressed.
She that is born a beauty is half-married.
She that has an ill-husband shows it in her dress.
Solomon the wise, 'a good wife is a good price.'
She who is born handsome is born married.
Who has a bad wife, has purgatory for a neighbor.
The cunning wife makes her husband her apprentice.
The more women look in their glasses the less they look to their houses.
There is one good wife in the country, and every man thinks he has her.

Be Anxious! We advise, if stated to the Canadian authorities, have arrested a number of the St. Albans raiders discharged by Judge General, and that a proclamation has been issued offering a reward for the apprehension of others. The Canadian authorities have also called out the militia and are taking measures to prevent further raids being made into the United States from Canada.
A. T. Stewart of New York, has \$2,000,000 invested in real estate.

PUTNAM'S CLOTHES WRINGER.
It is the only reliable self-adjusting clothes wringer.
No Wood-work to Swell or Split.
No Thumb-screws to get out of order.
Wrought with or without Cog-Wheels.
It took the First Premium at Fifty-seven State and County Fairs in 1864, and with-out an exception, the best Wringer ever made.
Patented in the United States, England, Canada, and Australia. Agents wanted in every town.
Energetic agents can make from 3 to 10 Dollars per day.
WHAT EVERYBODY KNOWS, viz: That iron will rust, and that a complete clothes wringer is better than a complete clothes wringer.
That a Wringer should be self-adjusting, durable, and efficient.
That Thumb-Screws, and Fastenings cause delay and trouble to regulate and keep steady.
That wood-work in hot water will swell, shrink and split.
That wood settings for the shaft to run in will wear out.
That the Putnam Wringer, with or without cog-wheels will not rust, and will last longer.
That the Putnam Wringer has all the advantages, and not one of the disadvantages.
That all who have tested it, pronounce it the best Wringer ever made.
That it will wring anything from a thread to a bed quilt, without alteration.
We might fill the paper with testimonials, but insert only a few to convince the skeptical, if such there be; and we say to all, Test Putnam's Wringer.
Test it thoroughly with any and all others, and if not entirely satisfactory, return it.
Putnam Manufacturing Co.
Cleveland, Ohio.
I know from practical experience that iron will rust, and that a complete clothes wringer is better than a complete clothes wringer.
That a Wringer should be self-adjusting, durable, and efficient.
That Thumb-Screws, and Fastenings cause delay and trouble to regulate and keep steady.
That wood-work in hot water will swell, shrink and split.

That wood settings for the shaft to run in will wear out.
That the Putnam Wringer, with or without cog-wheels will not rust, and will last longer.
That the Putnam Wringer has all the advantages, and not one of the disadvantages.
That all who have tested it, pronounce it the best Wringer ever made.
That it will wring anything from a thread to a bed quilt, without alteration.
We might fill the paper with testimonials, but insert only a few to convince the skeptical, if such there be; and we say to all, Test Putnam's Wringer.
Test it thoroughly with any and all others, and if not entirely satisfactory, return it.
Putnam Manufacturing Co.
Cleveland, Ohio.

PUTNAM'S CLOTHES WRINGER.
It is the only reliable self-adjusting clothes wringer.
No Wood-work to Swell or Split.
No Thumb-screws to get out of order.
Wrought with or without Cog-Wheels.
It took the First Premium at Fifty-seven State and County Fairs in 1864, and with-out an exception, the best Wringer ever made.
Patented in the United States, England, Canada, and Australia. Agents wanted in every town.
Energetic agents can make from 3 to 10 Dollars per day.
WHAT EVERYBODY KNOWS, viz: That iron will rust, and that a complete clothes wringer is better than a complete clothes wringer.
That a Wringer should be self-adjusting, durable, and efficient.
That Thumb-Screws, and Fastenings cause delay and trouble to regulate and keep steady.
That wood-work in hot water will swell, shrink and split.
That wood settings for the shaft to run in will wear out.
That the Putnam Wringer, with or without cog-wheels will not rust, and will last longer.
That the Putnam Wringer has all the advantages, and not one of the disadvantages.
