On the 27th of January, 1865, my husband called on Dr. Schenck, 32 Bond street, New York, and stated to him my case, with a re-quest for him to call and see me, which he did, and examined me with the respirometer. When he was about to go I asked him if he could cure me? His reply was: "I cannot tell, both lungs are diseased, and the bronchi-al tubes are allected on both sides." And yet he seemed to think there were lungs enough left to effect a cure if the diarrhea could be stopped. He said in order to do this, he would have to give me Maudrake Pills in small doses at first, to carry off the morbid matter, and then, with astringents, he hoped to check it, which he did, but the constant coughing, night sweats, and diarrhea had prostrated me so that he was afraid my vital powers were embracing all the Novelties of the Season, too much prostrated ever to rally, and yet he seemed to think if I could live to get enough Pulmonic Syrup through my system to cause expectoration there were lungs enough left for me to recover.
