THE CHOLERA COMING.—This is the heading to an editorial in a. New York nonthly, which asserts that so far the Cholera has been the same in its course 13 in previous visitations, and next summer it will be due in this country. It mer urges the authorities of the city, New York,) to measures to prevent the scourge, showing that where fith and dirt exists, there will the cholera be. And gives, for example, the populous in England, which was twice visited by the cholera, the disease making fearful ravages, the third time when the cholera was all around the city, the authorities undertook to avert the calamity by means of effectual cleaning, and efficient lown was saved in the midst of the most frightful desolation which was going on all around it. We have heard persons ridicule the action of our town council in appointing a sanitary committee to se that all filth and offal be removed from the borough precincis, and we believe the usefuluess of the committee. tery wrong, for where filth is disease will be. What could be easier than the introduction of this louthsome disease Works, which have already given notice to their tenants that from and after April first, no cows, goats, hogs, &c., being fullowed.

WELL TO DAY, SICK TO-MORROW .- Such is the experience of thousands. Few enjoy continuous health. To what does the occasional invalid attribute his uncertain condition? Not to himself, of course. He lays the blame on the climate, perhaps. It is too hot, or too cold, or too damp, or too dry, or too variable. But does he take the proper course to fortify his constitution and bodily organs against the extremes and changes of which he complains? No. He says, perhaps, that only an iron man could bear such great heat, or such violent cold, or such sudden vicissitudes.
