A new article in this market, and far superior A new article in this market, and far superior to any other in use. A few reasons why:

First.—They are free from twine, which is affected by the lime, and liable to rot, causing the falling out of the bristles.

Second.—The bristles are inserted in the wood, or body of the brush, when green; which when dry, causes them to be held firm in their place; any subsequent soaking or shirtles age fails to affect them.

Third.—They are made of Bristles exclusively; many kinds being composed, in part, of whalebone.

Fourth.—They contain more bristles for the size, and are as cheep as the ordinary kind.
