NEW SKIRT FOR 1866 !

The Gret Invention of the Age in HOOP SKIRTS.

J. W. BRADLEY'S

New Patent Duplex Elliptic (or double) Spring Skirt.

THIS Invention consists of Duplex (or two) Elliptic pure refined steel springs, ingeniously braided tightly and firmly together, edge to edge, making the toughest, most flexible, elas-tic and durable spring ever used. They sel-dom bend or break, like the single springs; and consequently preserve their perfect and beautiful shape more than twice as long as any single spring skirt that twice as long as any single spring skirt that ever has or can be made. The wonderful flexibility and great comfort

and pleasure to any lady wearing the Duplex Elliptic skirt will be experienced particularly in all crowded Assemblies, Operas, carriages, GRATEFUL for past favora I would return from thanks to my numerous friends and pa-trons and inform them that I still continue the old business at the old stand, where I will be pleased to see them at all times, and having a full and splendid eccent dress. A lady having enjoyed the pleasure, com-fort and great convenience of wearing the du-plex elliptic steel spring skirt for a single day will never afterwards willingly dispense with their use. For children, Misses, and young ladies they ar superier to all others. The hoops are covered with 2 ply double twisted thread and will wear twice as long as the single varn covering which is used on all the single yarn covering which is used on all Single steel hoop skirts. The three bottom rods on every skirt are also double steel, and twice or double covered to prevent the cover-ing from wearing off the rods when dragging down stairs, stone steps, &c., &c., which they, are constantly subject to when in use. All are made of the new and eegant corded tapes, and are the best quality inlevery part giving to the wearer the most graceful and perfect shape possil le, and are unquestionably the lightest, most desirable, comfortable and economical Skirt ever made.
