MALARIA EVERYWHERE .- Rarely has there been a season as fruitful as this of malarious diseases. Not only on the parairies and in the valleys of the West; not merely in all the old haunts of Fever and Ague and Bilious Remittent Fever have these prostrating diseases been unusually virulent; but they have extended to towns and cities never before infested with them, and have ascended the mountains and attacked thousands of people supposed to have been placed by the laws of Nature above their reach. Hence we are compelled to admit that a fatal element pervades the universal air this season, and should at once resort to the only approved preventive of its consequences, Hostetter's Stomacn Bitters, a tonic so potent, an anti-septic so perfect, an alterative so irresistible, and a stimu lant so pure, that it enables the human system to resist and baffle all the predisposing causes of disease. With the confidence that one clothed in incombustible garments might move among blazing buildings, the man who arms himself against malaria with this powerful defensive medicine may walk a fever-scourged district fearless of its insalubrious atmosphere. The intermittents and remittents at present so general in all parts of the country may be but the forerunners of a deadlier scourge now on its way westward from the far East. Prepare the system with Hostetter's Bitters for a successful battle with the mephitic causes of all enidemics. Be wise in time. Sold everywhere -New York World. Nov. 6, 1865.
