DR.J.H. SCHENCK, THE GREAT LUNG DOCTOR OF PHIL-ADELPHIA. OFFICE N.Y. AND GALENA LEADCO., No. 28 Nassau St., New York, June 1, 1865. DR.J.H. In August last I had a very severe hemorrhage, and, according to the judgement of a good New York physician, I was classed as beyond the reach of medicine and was advised to be piepared, so far as pro perly matters were concerned, to leave at short notice. The physician (and my good friends) said that the first cold I took must prove fatal. Early in January I took a se-vere cold, and fortunately was occupying rooms at No. 32 BOND STREET, directly over your office. My fect and limbs were very much swollen, and all the symptoms of a speady death seem-ed to accompany my cold. I sent for my former physician, and stated to him that I was taking your medicine, and after showing them to him, and baving tastea of them &c., he replied: "You can take them if you, like they willd you no harm." The doctor called a few times, and found me (much to his surprise, he said,) improving, and he could not understand why. My faith was increasing in your medicines, and I had a wish to have you examine my case, and see

My circulation, my cough, my appetite, all began to improve, and I could walk about my room a little. You visited me nearly every Tuesday, and found me improving, and told me not to go out of my room untif the first day of May. I took no cold while under your treatment, my appetite became first-rate, and you told no to not course thing. I wided of n you told me to eat everything I wished of a nutritions nature, and to exercise about the room as much as pressible. Having thoroughly tested the Excelsior Fruit Jar and after using many other kinds I accord to it superiority over all others for preserving fruit, ease of securing it and in fact in every way do I consider it better. First National Bank of Marieth.

AN IMPROVED LANTERN. THIS is the most desirable Lantern in the market. It burns Coal Oil without a Chimney, emitting neither smoke nor smell. It gives a pure white light. It stands quick motions in any direction. The fiame is regulated from the outside. It is neat and compact in form and size. It is free from solder in the upper parts, and is otherwise very substantial in its structure.
