

The Mariettian

MARIETTA, PA. Saturday Morning, November 10, 1866.

Judge Bond, of Baltimore, whose firm action in the present trial has excited the admiration of the loyal people of the whole country, did about as good a thing during the war. He was applied to for a habeas corpus for slaves who were running away from their masters and enlisting in the army.

The income list of the city of Harrisburg for the year ending June 30th, 1866, is just published. Hon. Simon Cameron returns his income at \$28,741; J. Donald Cameron \$21,319; Hon. John O. Kunkel, \$9,180; James McCormick, Sr., \$50,400; James W. Wier, \$18,019; David Fleming, ex Speaker of the Senate, \$12,018; Charles L. Major General Olintho B. Fisk, formerly commanding in Tennessee—a soldier of valor and fidelity during the war, and after the war an officer in the Freedman's Bureau—who was removed by President Johnson, has become a resident of New York city; having accepted the position of Vice President of the Metropolitan Insurance Company. The situation is a very handsome one.

Gen. Sweeney, formerly belonging to the regular army, and who was struck from the list, in consequence of his accepting a commission from the Fenians, has abandoned the latter organization and is now an applicant to be reinstated in his position of Major. It is said the President will comply with his request.

A writer in a late number of Once A Week (London) says that Benjamin Franklin, on his return from Paris to Philadelphia, was "elected Governor of that State, and shortly afterwards President of the United States of America." It would be difficult to crowd more errors than these into two lines.

General Sheridan held an Indian council at Fort Dodge on the 7th inst. He gave the Indians eight days to bring in the three white women they have, and if they did not return them without presents, it would be war. The Indians then started home to have a council among themselves.

A woman who gave her name, as Anna Printer, from Philadelphia, was found insensible in one of the Catholic churches of Cincinnati, on Saturday, and died on Monday evening. She stated that she had been drugged in the cars and robbed of all the money she had.

A. T. Stewart's project of erecting a number of model tenements for the poor, has been undertaken in good earnest, and the practical results will soon be apparent. The estimated cost is five millions of dollars.

A cow was recently drowned by a mud turtle near Ogdensburg, N. Y. She had gone into the water to drink, when the turtle fastened to her nose and held it so long under water as to suffocate the cow.

A notorious horse thief, named James Oldfield, was arrested at Eddyville, Iowa, and while waiting for the cars with the officers, took a quantity of strychnine, which produced death instantly.

A man who was stolen from Jackson, Mich., thirty years ago, when a mere boy, has just returned to his parents who for a lifetime had supposed him dead.

The State of Oregon; one of the youngest in the Union, has more public schools, 443, than South Carolina, one of the original thirteen States.

Give Georgia the density of population that Massachusetts has, and it would be the wealthiest State in the Union.

Solemn services have been ordered in the Mexican church to invoke the restoration of the Empress Carlotta's health.

We regret to hear of the death of a plot to secure from the State of Kansas at least one Johnsonite United States Senator. Gen. Pomeroy's term expires, and a successor is also to be chosen to General Lane. Kansas is overwhelmingly Republican, and before the people no Johnsonite stands the ghost of a chance. So mortified was Lane at the manner in which he sacrificed his prospects by favoring Johnson, that he committed suicide. Yet we are told that there is now a real danger of some trickery being played off to divide our friends in the ensuing legislature, and elect one Johnsonite Senator, by a combination, with some weak-kneed faction of Republicans. We hope the report is unfounded, and if so, shall rejoice to contradict it.

Twenty-seven families of Poles sailed from New York for Richmond, in the steamship Virginia, on Saturday afternoon, to settle in Spottsylvania county, Va., on 2500 acres of land, sixteen miles south of Fredericksburg, purchased for them by General Fochman, one of the directors of the American Emigrant Aid and Homestead Company. They are to pay for the land at the rate of \$5 per acre at the expiration of six years. One thousand of the 2500 acres have been cleared, and will be put under cultivation next spring. Implements, seeds, and provisions have been furnished from funds raised by subscription in New York. The owners of the Virginia gave the emigrants free passage to their new homes.

The Peabody Institute of Baltimore was formally opened on the 25th, on which occasion an address of welcome to Mr. Peabody was delivered by Gov. Swann, Mr. Peabody replying briefly. Mr. Peabody has given another half million to this Institution, and is said to have given a million dollars to different educational and religious institutions since his arrival in this country.

In the Catholic Sabbath schools at Nashville, colored children are taught in the same classes with the white children. The Catholics are a shrewd sect. No sooner is the negro free than they set to work to add him to the strength of the church, the same as they did the Indians in South America. They already have declared that there must be no distinction within the pale of the church on account of color. They thus take the lead of all the churches.

Poison, writes a correspondent of an English journal, is in some parts of Germany labelled with a skull and cross bones, as black as printer's ink can make them. He recommends this as a device that should be used in all countries, for it strikes at once the comprehension, not only of the learned, but also of the dullest and most ignorant people.

The New York Journal of Commerce reports that the traffic in "skunk skins" amounts to quite a handsome sum annually. The article in question, however, is by no means sold as a skunk skin, because in this case it is self-evident that a "rose by another name would smell as sweet" and the skillful furrier, therefore, announces it under some taking title, such as "Prairie Badger" or "Mountain Otter."

Official advice from Arkansas state that twenty-nine murders of freedmen, during the months of August and September, are on record, and that many more have probably occurred which are never heard from on account of the sparseness of the population. LABOR IN ENGLAND.—Mr. Willard, of New York, who is now travelling in the farming counties of England, writes as follows in regard to the "price of labor there: Laborers get \$2.75 per week, and two quarts of cider per day, and commence work at 6 A. M., and stop at 5 P. M. This is the extreme price for best hands on an average. Ordinary hands or those of poorer grade, get six shillings per week, and a quart of cider per day, and are paid weekly. No board is included as in America, for laborers. They pay a rent for their cottages and gardens—six shillings per week." He further says: "Wheat brings here now one dollar and fifty cents per bushel; barley one dollar per bushel, hay thirty-five dollars a ton, and mutton fifteen cents a pound. Think of that, ye farmers who pay twenty-five or thirty dollars a month for farm hands for the season, and two or three dollars per day and board for help in haying. Is it any wonder the common people of the old country consider the United States a land of promise, and flock to its shores by thousands?"

The English bench lately decided at Westminster that it was a principle of common law that a counsellor, in questioning a witness, should address him in ordinary tones, and in language of respect, such as is employed by one gentleman in conversation with another; that such lawyer has no right to question the private business or moral character of a witness any further than it is apparent they absolutely affect his reliability or touch the case in hand, and that a witness is not bound to answer questions put to him in an insulting or annoying manner.

Jimmy Wayson (colored), of Harmar, O., known as the old root peddler, was expelled from the African M. E. Church, at that place, because he voted the Democratic ticket and then lied about it. Jimmy said he was a peace Democrat, but did not know how to vote, said he had never heard of "Seward or Andy Johnson," but all would not save him and he went over to secession.

The resting places of the Union soldiers who died during the rebellion are to be marked hereafter with cast iron head blocks, instead of the wooden ones, as at present in the various national cemeteries. The names, number, &c. of each soldier are to be cast in raised letters. The Quartermaster General has accordingly invited proposals for furnishing the cast iron head blocks. About 280,000 of them are required.

The oldest city in the world is Damascus. Tyre and Sidon have crumbled on the shore; Baalbec is a ruin; Palmyra lies buried in the sands of the desert. Nineveh and Babylon have disappeared from the shores of the Tigris and the Euphrates. Damascus remains what it was before the days of Abraham—a centre of trade and travel, an island of verdure in a desert.

Notwithstanding the fact that the property of all colored people in Washington, D. C., is taxed for school funds, and that Congress has passed strict laws requiring the city to pay to the trustees of colored schools their share of the funds provided for education, not a cent has been paid over for thirteen months. The trustees of this school have therefore made a formal demand on the Mayor of Washington for the money.

A dry goods merchant in Vermont advertises as follows: "The female who carried off a pair of black kid gloves from our store, took also—by mistake, doubtless—half of another pair. She is respectfully requested to return the odd glove, or to come to our store and get the one left, as a single glove, like a single individual, is poor stock until mated."
