Important to Young Men and Teachers.

Every young man, whatever may be his future calling in life, will find a thorough and practical business education his greatest aid to success. Such a course may be had by all, as the expense and time necessary for a thorough preparation can readily be spared from the earnings of every industrious youth in the country. Three months only are necessary for a preparation that shall introduce any farmer's sep, teacher or mechanic, iuto a business position that Woods, C. B. Grubb, A. Herr Smith, shall bring him a good salary, and that may lead him on to a business success. At Philadelphia, Pa, a system of instruction has been introduced into J. C. Mumford's Business and Telegraph College that must be thoroughly practical, and work a revolution in commercial instruction in all schools having at, lieury Esbenshade, John Doner, pupils enough so that it may be introduced. Unfortunately this system of instruction can only be carried out in a few of the larger schools in the United States, as it requires for its successful operation a great number of students in daily attendance. This course is receiving the encouragement and enthusiastic support of the leading business men and educators throughout the country, and is drawing for this College patronage from nearly every State in the Union. The practical arrangement of every department makes it profitable for young men to come hundreds of miles to enjoy its advantages, as at no other school in the country can equal advantages be had for business educa-
