

The Mariettian.

MARIETTA, PA.

Saturday Morning, July 6, 1867.

The Washington correspondent of The Press has the following in regard to the case of John H. Surratt: "Grave doubts are entertained as to whether Surratt can be convicted. His counsel, for some reason, are very confident of his release. It is thought their chief reliance is upon a disagreement among the members of the jury, some of whom are known to be devoted Roman Catholic Copperheads. As I informed you previously, the Catholic church, which is very strong here, is doing everything to aid the prisoner. Weichman and St. Marie are Catholics but are persecuted beyond measure by the priests and prominent members of the church. Both have been threatened with assassination.

Maximilian was really shot by order of Juarez, on the 19th of June. It is believed that Juarez reluctantly consented to the execution of Maximilian. When the messenger bearing despatches from our Government relative to sparing the life of Maximilian delivered his packages to Juarez, the latter informed him that he (Juarez) was disposed to spare the life of Maximilian, but the pressure from the Mexican leaders and people for his execution was so great that it would be almost impossible to resist it.

Hon. Charles Denison, member of Congress from the Twelfth District of Pennsylvania, died at his residence in Wilkesbarre, on the 27th ult., after a lingering illness. Mr. Denison was born in Wyoming Valley in 1818, graduated at Dickinson College in 1839, adopted and practiced the profession of law, was elected a Representative to the Thirty-eighth Congress, and re-elected to the Thirty-ninth and Fortieth Congresses.

During a recent wedding in a church in a village near Troy, when the clergyman asked if anybody knew any reason why the ceremony should not proceed, a woman rose in the audience, and forbade the bans on the ground that the groom had promised to marry her when her husband died. The clergyman decided that she had no right to look far ahead, and went on with the ceremony.

The impeachment of the President will probably be initiated by the proper proceedings at the present session of Congress. The Judiciary Committee some time since announced that it had sufficient evidence to warrant such a movement. If this really is the fact, the country is prepared for the work of punishment.

One Colonel Schumaker first discovered coal in Pennsylvania in 1811, but the people had no faith in the discovery, and Schumaker, after losing eight years labor and a large fortune, subsequently became insane and died in the lunatic asylum in Philadelphia, after twenty-one years confinement as a madman.

A young man named John Rivers last week, in Putnam county, Ga., was gathering strawberries in his father's patch, on his hands and knees, when a rattlesnake sprung and struck him on the neck. A physician was sent for at once, but before he arrived the young man was dead.

A young man named Leahr recently married the daughter of one Schmidt, in St. Louis. He had fairly earned her, having three years since agreed to labor for her parents for that period, the remuneration being board, clothes and Sophia. He had to make the agreement or lose Sophia.

There is now a Priest residing at Capri, who possesses 200 blind Quails. He has had their eyes put out with a hot knitting needle in order that they should call, and so decoy others of their species. There should be a prevention of cruelty society established at Capri.

Mr. Lord, upon whose property the famous Lord bond robbery was committed, last week received from an unknown source \$1,200,000 of the bonds stolen from him. This leaves a deficit of only \$90,000 still missing. Mysterious as usual.

Wednesday last found the Fortieth Congress at its post, and ready for duty. The roll was called, and a quorum was found present, and the country was safe again.

Gen. Goffard, ex-President of the Republic of Hayti, has arrived in Paris. He is described as a fine tall man of color with a white moustache.

APPEARANCE OF THE POPE.—A correspondent at Rome describes the personal appearance of the Pope, as follows: "I met him the other day on the Via Angelica, a pleasant, shady street that runs out north under the walls of the Vatican, where he had gone, as is his wont, to take an evening drive. He generally drives out between 5 and 6 o'clock goes out a few hundred rods, and then dismounts and walks. I saw him walk over a mile and then disappeared from sight, still walking, while his carriage followed slowly or behind. He walks with the totter peculiar to old age, and with a considerable stoop, and yet with not a little rapidity and energy. I am bound to say of Pius IX, has the pleasantest face I have seen in Europe; his good nature amounts to a weakness, and his hesitation is said to give his councillors trouble."

A correspondent of the Cincinnati Gazette has made the acquaintance of Solomon Thomas, a gate keeper at Esirmount, Ind., who is now in his eighty ninth year, and who, while living in Iowa, sent to the army during the Rebellion, twenty-four sons and sons-in-law, all of whom, after years of hard service, returned home unharmed. Mr. Thomas is in good health, is very active both in body and mind, and bids fair to outlive many men of forty.

Eminent men of science have discovered that electricity and magnetism are developed in the system from the iron in the blood. This accounts for the debility, low spirits and lack of energy a person feels when this vital element becomes reduced. The Peruvian Syrup, a protoxide of iron, supplies the blood with its iron element and in the only form in which it is possible for it to enter the circulation.

It is said that during the siege of Queretaro the women of the city carried food and drink to the soldiers in the trenches, at the peril of their lives. Many thus fell victims to their conjugal devotion. One was shot through the breast by a bullet, which likewise killed the infant, strapped to her breast. A second had her head taken off by a round shot. A third was killed by a bullet in the plaza.

In a school recently a teacher took occasion to relate an anecdote of a little girl who tried "to overcome evil with good," by giving a new Testament to a boy who had ill-treated her. The story was appreciated, for a few minutes afterwards one boy struck another, and being asked the reason, said he was "trying to get a Testament." This was a practical bearing altogether unexpected.

A resident of Berlin recently went to sleep with cigar in his mouth. The next morning he was found to be unconscious. He slept, and could not be awakened by the most violent shaking. The expression of his features was calm and his body was rigid and unimpressionable to pain. He was restored on the seventh day.

3rd. After the polls are closed the board shall proceed to count the votes that each candidate received, and make out the returns accordingly, to be certified to by the Judge and attested by the clerks.

5th. Any two or more persons having an equal number of votes for the same office, the Judges shall proceed to ballot for a choice, the person having the highest number to be the nominee.

6th. The Return Judges shall be competent to reject, by a majority, the returns from any election district, where there is evidence of fraud, either in the returns, or otherwise, to the extent of the frauds committed.

The Union Pacific Railroad Co., are now constructing a railroad from OMAHA, NEBRASKA, westward towards the Pacific Ocean, making with its connections an unbroken line ACROSS THE CONTINENT.

The Company now offer a limited amount of their FIRST MORTGAGE BONDS having thirty years to run, and bearing annual interest, payable on the first day of January and July, in the city of New York, at the rate of SIX PER CENT. IN GOLD, AT NINETY CENTS ON THE DOLLAR.

This road is already completed to Julesburg, 376 miles west of Omaha, and is fully equipped, and trains are regularly running over it. The Company has now on hand sufficient iron ties, etc., to finish the remaining portion to the eastern base of the Rocky Mountains, 141 miles, which is under contract to be done in September of this year, and it is expected that the entire road will be in running order from Omaha to its western connection with the Central Pacific, now being rapidly built eastward from Sacramento, Cal., during 1870.

Means of the Company. Estimating the distance to be built by the Union Pacific to be 1,665 miles, the United States Government issues its Six per cent. Thirty-Year Bonds to the Company as the road is finished at the average rate of about \$28,250 per mile, amounting to \$44,208,000. The Company is also permitted to issue its own First Mortgage Bonds to an equal amount, and at the same time, which by special act of Congress are made a first mortgage on the entire line, the bonds of the United States being subordinate to them.

The Government makes a donation of 12,800 acres of land, to the mile, amounting to 20,032,000, estimated to be worth \$30,000,000 making the total resources, exclusive of the capital, \$118,416,000; but the full value of the lands cannot now be realized.

The authorized capital stock of the Company is one hundred million dollars of which five millions have already been paid in, and of which it is not supposed that more than twenty-five millions at most will be required. The cost of the road is estimated by competent engineers to be about one hundred million dollars, exclusive of equipment.

Prospects for business. The railroad connection between Omaha and the East is now complete, and the earnings of the Union Pacific on the sections already finished for the first two weeks in May were \$113,000. These sectional earnings as the road progresses will much more than pay the interest on the Company's bonds, and the through business over the only line of railroad between the Atlantic and Pacific must be immense.

Value and Security of the Bonds. The Company respectfully submit, that the above statement of facts fully demonstrates the security of their Bonds, and as additional proof they would suggest that the Bonds now offered are less than ten million dollars on 517 miles of road, on which over twenty million dollars have already been expended;—on 330 miles of this road the cars are now running, and the remaining 187 miles are nearly completed.

At the present rate of premium on gold these bonds pay an annual interest on the present cost of Nine Per Cent. and it is believed that on the completion of the road, like the Government Bonds, they will go above par. The Company intend to sell but a limited amount at the present low rates and retain the right to advance the price at their option.
