DR. MOTT'S Chalybeate Restorative Pills of Iron. An aperient and Stomachic preparation of a purest purified Oxygen and Carbon by absorption in Hydrogen. Sanctioned by the highest Medical Authorities, both in Europe and the United States, and prescribed in their practice.

The experience of thousands daily proves that no preparation of iron can be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complexions, indicate its necessity in almost every chronic case.

In Debility, Nervous Affections, Curvature, Dyspepsia, Constipation, Diarrhea, Dysentery, Incipient Consumption, Scrophulous Tuberculosis, Salt Rheum, Mismenstruation, Chlorosis, Whites, Live Complaints, Rheumatism, Intermittent Fevers, Pimples on the Face, &c.

In cases of General Debility, whether the result of acute disease, or of the continued diminution of nervous and muscular energy from chronic complaints, one trial of this restorative will be found necessary to restore the patient to his former health.

Some very singular instances of this kind are attested of female Sufferers, emaciated victims of apparent marasmus, and guineaen exhaustion, critical changes, and that complicated of nervous and digestive derangement, in which the physician has no name.

In Nervous Affections of all kinds, and for reasons familiar to medical men, the operation salutary, for, unless the blood be necessarily, it is viciously tonic, without being exciting and over-heating; and gently, regularly aperient, even in the most obstinate cases of costiveness without ever being a gastric purgative, or inflicting a disagreeable sensation.

In this latter property, among others, which makes it so remarkably effectual and permanent a remedy for Piles, upon which it also appears to exert a distinct and specific action, by dispersing the local tendency which forms the basis of the disease.

In Dyspepsia, innumerable as are its causes, a single box of these Chalybeate Pills has often sufficed for the most habitual cases, including the attendant Costiveness.

In unchecked Diarrhea, even when advanced to Dysentery, confirmed, emaciating, and apparently malignant, the effects have been equally decisive and astonishing.

In the local pains, loss of flesh and strength, debilitating cough, and remittent, hectic, which generally indicate Incipient Consumption, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances.

In Scrophulous Tuberculosis, this medicated iron has far more than the good effect of the most cautiously balanced preparations of iodine, without any of their well known liabilities.

The attention of females cannot be too constantly invited to this remedy and restorative, in the cases peculiarly affecting them.

In Rheumatism, both chronic and inflammatory—in the latter, however, more decidedly—it has been invariably well reported, both as relieving pain and reducing the swellings and stiffness of the joints and muscles.

In Intermittent Fevers it must necessarily be a great remedy and energetic restorative, and its progress in the new settlements of the West, will probably be one of high renown and usefulness.
