VICTORIA'S FIRST MOMENT OF SOV-EREIGNTY .- William the Fourth expired about midnight at Windsor Castle. The Archbishop of Canterbury, with other high functionaries of the kingdom, was in attendance. As soon as the King had breathed his last, the Archbishop quitted Windsor and made his way to Kensington Palace, the residence at that time of the Princess Victoria, where he arrived before daylight, and announced bimself, request-Princess. She hastily attired herself, and met the venerable Prelate in the ante-room. He informed her of the demise of the Crown, and did homage to her as the Sovereign of the nation. She was at eighteen Queen of the only realm, in fact or history, deeply agitated. The first words she uttere I were these: "I ask your prayers in my lehalf." They knelt down together, and the voung Sovereign inaugurated her reign like the young King of Israel, by heart to judge so gr at a pcop'e, who could not be numbered not counted for the mui-

EMANCIPATION OF RUSSIAN SERFS .-The Guzette du Nord publishes intelligence respecting the emancipation of the serfs in Russia, and states that the principal measures proposed on this subject, have i cen adopted by the majority of the depufranchisement will be realized in the course of next Antunin, on the following basis: "Immediate grant of personal liberty to the persants, which has become all the the personal liberty of the peasants allows, any land. however, a transition state of two years, after which the emancipation shall be comlete. STRANGERS IN LONDON:-The Commissi ner of the city of London Police, caused an account to be taken of the number of 5.25. persons entering the city within a given period. The result shows that the amazing number of seven hundred and six thousand six hundred and twenty-one individuals passed into the city by its various entrances during the twenty-four hours tested; and as the day selected for the enumeration was free from any extraordinary attraction to the city, there can be no doubt that the return furnishes a fair estimate of the average daily influx. These numbers are altogether irrespective of the resident population.

By flat culture ground between the different clusters of plants perfectly level, instead of forming it into hillocks. Mr. Mead professes to have fully tried both the flat culture and the hilling system, and gives his decided approval to the former. Its advantages are that it requires less labor, admits of a more thorough cultivation of the soil, lessens the evils of drought, admits of the use of the most approved agricultural implements, and presupposes a thorough preparation of the soil. There are various other papers on horticultural subjects by writers in different parts of the country, which those who are interested in these matters may read with profit. Colored engravings of five different kinds of cherries illustrate the James Francisco number.

New Glue.

We advertise to-day a new style of glue, which must be needed in every house. This is reported to be the indentical gine with which the man glued his dog together after he (the dog not the man!) had split himself in two halves by running against a sharp post while in pursuit of a rabbit. It is related of this unfortunate dog that, he was stuck together with two legs up and down, and remained so for the rest of his life; albeit he was a more durable dog after than be-fore this slight accident, because while he was running on two legs the other two were resting, and he had only to flop over on the rested legs and go ahead, afresh. This only shows that care should be taken in sticking things together, when you have a good glue to work with—Zane; ville Aurora, November 25, 1859.

The great popularity of "Gruee Truman," (of which hirty thousand copies have been sold,) will secure, for this book, thousands of readers. READ WHAT THE PRESS SAY OF IT. From the New-York Examiner.

From the New-York Examiner.

The numerous readers of "Grace Tuman" have here another wak in a topic of deep and thrilling interest, from the author of that highly popular book. Mary Eunyan, the blind daughter of the imae stal dreamer, is referred to repeatedly in his autholography and other works. She was about twelve years of age when Eunyan was imprisoned in Bedford Jall, and his, suxiety on her behalf was one of his principal causes of distress in his long imprisonment.

As drawn by Mrs. Ford her character seems to have been one of great modesty and loveliness, and the story of her lovelfor William Donner, and of his death for the cause of closely william Donner, and of his death for the cause of interest of Eunyan's family history, and in the topography of Bufford and elstow. We can safely predict for the work an extensive sale.

extensive sale.

From the New-York Evangelist.

The simple incidents of Bunyan's life, his protracted imprisonment, his heroic endurance and long faith are of themselves full of the deepest and most thrilling interest. It needed-only the picture of his blind daughter Mary, in her gentleness and patience under sore misfortune, to give completeness to the tragic byt noble scenes in which Bunyan ligures, so modestly yet grandly conspicuous. The author of the volume before us has carefully gathered up such historical facts, and they are fortunately numerous and well authenticated, as cauld throw light upon the subject, and has employed them with great sagacity and effect in the construction of her story.

From the American Baptist, N. Y.

The announcement of a new work from the pen of the accomplished authoress of 'Grace Truman' will send a thrill of delight through thousands of hearts. The book will be read with an enthusiasm rarely-gequalled. There will be many a moistened eye over the beautiful pages of touching scenes in the history of one whom all know only to love. Before it was out of the press, five thousand copies had been ordered, and we doubt not it will have an immense sale.

Except the Pittshurch Chronicle. From the Pittsburgh Chronicle

This is the last product from the pen of a lady whose writings are rapidly becoming popular. Her last work, Grace Truman, had a sale of over thirty thousand copies, and this one is said to be a better and a more interesting book.
