THE ATLANTIC CABLE, Many persons doubt whether any message was sent over the Atlantic wires. Mr. Prescott, in his History of the Electric Telegraph," just published, states that from the 10th of August to the 18th of September one hundred and twenty-nine messages were sent from Valentia to Newfoundland; while the number-sent from Newfoundland to Walentia during the same period was two hundred and seventy-one, making a total of four hundred messages sent both ways. This statement is verified on oath. The number of words contained in these mes-sages is 4,859; the number of letters, 21,-1. In Mr. Prescott's work every one of hese messages is reported verbatim, in their proper chronological order.

### News. Foreign

The Adriatic, arrived at New-York, bri European news to August 1st.

GREAT BRITAIN. Very little was being done in Parliament. The proposition of Lord Palmerston, to increase the fortifications, had not been brought up for action. Attention was still paid to the formation of volunteer corps. The murders in Syria, and the complications, thence resulting, or likely to result, among the European Governments, afforded matters of the deepest interest.

The Emperor Napoleon is the most forward in proposals to send troops to Syria. He claims to the hereditary protector of the Christians there. He wishes, however, to so conduct matters as to maintain his declaration, that "the Empire is peace." The following very curious letter is published over his signature :

Napoleon's letter to the French Ambassador to London, dated July 25th, is published. He Says: Since the peace of Villa Franca, I have had but one thought, one object, to inaugurate a new era of peace and to live on the best terms with my neighbors, and especially with England. I have annexed Savoy and Nice. The extraordinary additions to Piedmont alone caused me to assume to desire to see reunited to France prov-inces essentially French. But it will be objected to; you wish for peace, and you increase immoderately the military forces of France. I deny the facts in every sense that my army and fleet had in them anything of a threatening character. My steam navy is even far from being equal to our requirements, and the number of steamers does not nearly equal that of sailing ships thought necessary in the time of Louis Phillip. I have four hundred thousand men under arms; but deduct from this amount sixty thousand in Algeria, six thousand at Rome, eight thousand in China, twenty thousand grenadiers, the sick and new conscripts, and you will see my regiments are of smaller effective strength than during the pre-ceding reign. The only addition to the army list has been by the creation of the Imperial Guard. Moreover, whilst wishing peace, I desire also to organize the forces of the country on the best possible terms; for if foreigners have only seen the bright side of the last war, I, close at hand, have witnessed the defects and wished to remedy them. Having said thus much, I have since Vil-la Franca, neither done or even thought any thing which could alarm any one. When Lav lette started for Constantinople, the instructions which I gave to him were confined to this use;

France, and to increase her resourses, are fields vast enough for his ambition, and sufficient to satisfy it. It was difficult for me to come to an nderstanding with England on the subject of Central Italy, because I was bound by the peace of Villa Franca. As to Southern Italy I am free from engagements, and ask no better than con-sert with England on this point as on others. In heaven's name let the eminent men at the head of the English Government lay aside their petty jealousies and unjust mistrusts. Let us understand each other in good faith, like honest men as we are, and not like thieves who desire to cheat each other. To live up to this is my nnermost thought. I desire that Italy should obtain peace, no matter how, but without foreign intervention, and that my troops should be able to quit Rome without compromising the security of the Pope. I could much wish not to be obliged to undertake the Syrian expedition, and in any case not to undertake it alone. Firstly, because it will be a great expense; secondly, because I fear this intervention may involve the Eastern question; but on the other hand I do not see how to resist the public opinion in my country, which vill never understand how we can leave unpunched, not only the massacre of Christians but the burning of our consulates, the insult to our

AMERICAN WATCHES, MADE BY THE MERICAN WATCH COMPANY, At Waltham. Mass.

Attention is invited to the following statement and accomanving letters of recommendation and testimonials, in favor these celebrated Watches. A gold medal was awarded to the Company by the Ameri-

can Institute, at New York, in 1857. The Company also received the first premium—a gold nedal—from the Franklin Institute, Philadelphia, in 1858. These Watches have now been in the market for nearly ten ears, during which time they have been tested as to accuracy, durability, and reliability in every conceivable manner, and have proved themselves to be the most satisfactory time pieces ever offered to the public.

This result has been brought about by a strict applica of, mechanical science to the construction of the Watch from its very inception, rendering it when finished, mathematically correct in all its proportions, and necessarily as perfect a ime-keeper as it is possible to make. The Company have tested their Watches in many instances y actual daily noting, and the result of this test has been hat they have exhibited a rate equal in regularity to the

hest marine chronometer. N. B.-We have just introduced a new style of Watch, elaborately finished, and thinner than any we have hitherto produced, with several improvements calculated to insure the greatest accuracy of performance, and to prevent the usual accidents and derangements to which foreign watches

The following is from Mr. PORTER, the well-known Marine Chronomeer and Watch Maker: Mr. R. E. Robbins, Treasurer, &c.

Boston, April 20, 1860.

Dear Sir: --Since my note to you of September, 1859, I have sold a number of your Company's watches, and hear good reports from them without exception. They give me o trouble and my customers every satisfaction. Recently a ship-master to whom I sold one last year, called to say that his Chronometer having broken down at sea, he navigated his vessel safely home by his Waltham Watch. Yours, truly, Gzo E. Pontes.

AMERICAN WATCHCOMPANT, Waltham: Gentlemen :-- Having carried one of your Watches for the ast eighteen months, I can say confidently that they will do, and may be bought with assurance that they will keep time. believe the watch unsurpassed.

Book Room, No. 200 Mulberry St., New York, Rebruary 6, 1860. Dear Sir :- I take great pleasure in being able to certify that for the last ten months I have carried a watch from the manufactory of the American Watch Company, and that it has given perfect satisfaction as a time-keeper. Judging from the one I have, I do not hesitate to predict that the day is not far distant when watches made in the United States

will supersede all others. JAMES FLOT, D.D. WILTON BLUFF, S. C., October, 20, 1859. R. E. Robbins, Esq.:

Dear Str:—The three watches of your manufacture which I purchased to be used on my plantation, have proved to be the most correct time-keepers I have ever known. I gave my nead servant, my head carpenter, and my head engineer, each one of them; and since they have been in their respect

ve possession, every thing on the plantation has moved like clock-work, in consequence of the extreme accuracy and regularity with which these watches perform. CHICAGO, Ill., March, 1860.
AMERICAN WATCH COMPANY, Waltham, Mass. I have tested with extreme care the running of the watch

bought of you, now nearly a year since, and so accurate and equable has been its performances that I have thought it would interest you, and all others familiar with horology, to see a record of its variations. It was finally set to true time 

Since which time its average monthly variations has not eeded six seconds. CAUTION, -As our watch is now extensively counterfeited by foreign manufacturers, we have to inform the public that no watch is of our production which is unaccompanied by a certificate of genuineness, bearing the number of the watch and signed by our Treasurer, R. E. Robbins, or by our pre

ecessors, Appleton, Tracy & Co. As these watches are for sale by lewelers generally throughout the Union, the American Watch Company do not solicit orders for single watches. ROBBINS & APPLETON,
