THE Stereoscope, as now used, was in- vented by Baptista Porta, in 1599. In some inquiries respecting the instrument, Sir David Brewster found that its funda- mental principle was well known even to Euclid, that it was distinctly described by Galen, one thousand five hundred years ago, and that Baptista Porta had, in the year above named, given such a complete draw- ing of the two separate pictures as seen by each eye, and of the combined picture plac- ed between them, that we recognize in it not only the principle, but the construction of the stereostope.
