Homestead Gas Light. The attention of our readers is particularly invited to the descriptions given below, by the in lbs. dried fruit, daily papers of this city, of a machinery for pro-141 quarts brandy, ducing gas from Naphtha at a most economical rate, which will, in a short time, bring about an 46 bushels rotatoes. entire revolution in the mode of lighting country 57 lbs. chicken soup, houses, and country and village churches. Comple and adequate tests have been given, so as to convince all who witnessed them, of the entire success of the undertaking. The time is not far distant when every country seat and every country and village church will be lighted by this ad. 65 lbs. corn starch. mirable contrivance. The firm engaged in the manufacture of these machines is a most respon-0 lbs. soap, sible one, and will take great pleasure in exhibiting and explaining it to all who wish information on the subject. See advertisement in another column.

GAS FROM NAPHTHA-SOMETHING NEW. - In common with quite a number of our citizens, we witnessed the lighting of the "Eastern Ex-change," at East Liberty, on Friday night, with gas extracted from naphtha, by a new patent pro-cess now being introduced into this community. We shall not attempt any elaborate description of the scientific principles on which the gas is generated, but will simply content ourself with lirecting the attention of the reader to the great fact that a rival light has sprung up in our midst, which bids fair to divide public attention, and public funds, with the old-established gas com-pany, which has so long enjoyed the monopoly of furnishing light to our citizens.

When we reached the Exchange, after dark, we found it brilliantly litup with gas, and had we not been apprised beforehand that the gas War.-Col. Straight, with 160 other Union ofwas produced from naphtha, we should have concluded that the Pittsburgh Gas Company had extended a gas-main to East Liberty. The light is soft, brilliant and steady, and it is claimed Col. Phillips, commanding expedition to the Indian Territory, reports to Gen. Thayer that he (and the figures would seem to bear them out) that the gentlemen who have control of the pat

ent, that its cost cannot by any possibility, ex-ceed more than one-half the amount now paid by gas consumers in the city. The machine in which the gas is generated appears so simple, that it is difficult to realize the work it performs. has driven the enemy entirely out of that region, and in several skirmishes killed nearly one hundred rebels, and captured one captain and twen-The express passenger train which left the Camden Street depot, Baltimore, on Thursday The apparatus is the invention of Jonathan Grif. fin, of Connecticut, and can be readily applied to night of last week, for Wheeling and intermedihotels, private houses, &c. There is not the ate points, was captured by a company of Con-federates, when near Kearneysville depot, about slightest danger of explosion, nor will the coldst weather have the least effect upon the flow of the gas. One gallon of naphtha, which now costs fifteen cents, will furnish five hundred feet of gas. A formidable expedition left Port Royal on the 5th instant, under command of Gen. Seymour, for Jacksonville, Florida, where it landed on the 8th. The expedition, it is reported, will push on The gentlemen who own the patent right, and who propose to engage extensively in the manufacture of the apparetus and adapting the same to practical use, have organized under the general incorporation act of this State, as a joint to Tallahassee. Gen. Gilmore and staff sailed on Sunday morning, 8th instant, in the transport Cosmopolitan, to join the expedition. Ad-miral Dahlgren has changed his flag-ship from the Philadelphia to the Pawnee, and sailed for stock company, with a capital of \$80,000. And as the machines, for the most part, will be man-ufactured here, this alone will add largely to the trade and business of Pittsburgh. But our space A portion of the guerrilla party that stopped the train on the Baltimore and Ohio Railroad and is already filled. Such of our citizens as have not witnessed the success of this new light, can obbed the passengers, were overtaken and capdo so by calling at Lafayette Hall, where every tured in a few hours after the robbery had been facility will be extended for thoroughly exam committed. Gen. Sullivan was ordered to and ing and understanding the process by which the gas is generated.—Pittsburgh Post. did dispatch a force of about three thousand, mounted men to overtake the highwaymen. The thieves, on finding themselves thus situated, re-

new gas machine, the invention of Jonathan Griffin, of West Meriden, Conn., is about being ntroduced in Western Pennsylvania, and manu factured in this city. The new hotel near East Liberty is supplied with gas by the apparatus, and on Friday evening last we had an opportu-nity of seeing it operate. We will not attempt a mers. The feeling among the citizens against the acts Citizens of Emlenton, ".... 8.00 of these robbers is very strong, and even vin-Mrs. E. Neil, Greenville, Clarion co, "... 5.00 dictive. The Unionists and rebel sympathizers means of bellows, operated by clock work, and

conneci

rith an air

atter is, that this gas, the moment it escapes, mingles and intermixes with the atmosphere; and unless a room be air-tight, which is not the case with any sleeping-room, an explosion from leaving the gas escaping, is utterly out of the question. The greater the number of burners gnited the more rapidly the gas is generated, on the principle of creating a greater vacuum, and causing an eased current of air-so that the pressure is equal-being precisely the same whether there be one burner or two hundred. The cost of this gas is not beyond one-third that of the city gas per one thousand feet, while the light is equally brilliant. The result will inevitably be, that it will supersede the latter to a great extent. It is natural that the community hould patronize the most economical. The ma-

chine is so simple in its construction, and so un-likely, nay, almost impossible, to get out of order, that any person of ordinary capacity can run it. The gas is manufactured on the hotel prem-

ises, by means of an ingenious and very simple apparatus, invented by Jonathan Griffin, of Meridan, Conn. A current of atmospheric air . .

is, by means of a set of bellows, worked by a weight, or spring and fusce, like the works of a clock, or watch, forced through the maphtha, which is in an air-tight tank, and generates the gas, which passes at once into the pipes. As soon as the pipes are filled the clock-work ceases to move and only starts as the burger cases to move, and only starts as the burners tre lighted, and moves more rapidly as the numper of burners lighted is increased. No gas can coumulate beyond the mere contents of the pipes, and no water being used, no trouble arises from cold weather. One gallon makes five hun-

kiss, that is claimed for it by the patentee. We are not fully acquainted with the scientific working Made life pass away in seasons of bliss.

of the machine, but may attempt to give an idea of it. The ordinary atmospheric air is forced by means of clock-work and bellows through the naphtha from which the gas is manufactured, and which is contained in an air-tight tank, and thus the gas is generated, and passes at once into the pipes, and is ready for use. As soons as hours

the **r** es are filled the clock-work ceases to move until the burners are opened, and the gas lighted, when it begins to move more rapidly, and the more burners lighted only accelerates its motion. No accumulation of gas takes place, as no water is used, and no change of weather can interfere

with the manufacture of the gas. Son. The whole apparatus is to all appearance very imple, and can be put in motion by a process as simple as the winding of a clock. The gas burns

Penn and Stanwix Streets, and they are making preparations to manufacture them on an extensive scale, and on such terms as will place them within the reach of all property owners. We understand that a joint stock company has been or-ganized, under the style of the "Griffin Homestead Gas Apparatus Manufacturing Company,' with a capital stock of \$80,000, and they will be made at the establishment of Foster & Co., as

ful feature of this mode of generating gas is, that no more is made than will fill the pipes for immediate use, and hence there is little or no dan-ger from explosion. Another security against the that is that it is the security against th DAVIS, CLARKE & CO.:

Street, are making preparations for the manufac-ture, on an extensive scale, and are already in re-Congress .- The Enrollment bill as it passed ceipt of large orders from inland towns. With the advantages claimed for the invention the House, differs very materially from the Sen-ate bill, and necessarily goes back to the Senate. demonstrated, the parties concerned cannot but experience a lively demand for it. We learn that quite a number of our citizens, owning country seats, have ordered machines, feeling sat-Its points are as follows: 1. Both classes are consolidated. 2. Exemption is only granted on payment of the commutation of three hundred lollars, until all names put in the box are draftisfied that economy, comfort, and convenience, justify the investment. Those who desire to be are only confined to the Vice President, Gov-ernors of States, and United States Judges. 4.

convinced of the utility of the machine, should see it operate. All slaves between eighteen and forty-five are liable to be drafted, and loyal owners to be com-We are not sufficiently posted as to minutia, but were informed that two gallons of naphtha will generate one thousand feet of gas. Naphtha, at present, retails at fifteen cents per gallon .-

Dispatch THE GRIFFIN GAS-LIGHT-A GREAT ACHIEVE Reported Specially for the Banner, up to the hour of MENT .-- On Friday evening we visited the elegant new hotel recently erected at the Stock-yards, near East Liberty, for the purpose of witnessing the experiment of lighting this mam-Advices from Chattanooga state that Sherman's advance is creating great consternation The rebel papers state that 102 Union officers

withersing the experiment of lighting this mam-moth establishment with gas manufactured upon the premises. In the basement we found a small apparatus, consisting mainly of an air-tight tank containing naphtha, through which a current of air was kept constantly passing: A highly in-flammable gas is thus formed, which is conduct-ed through ordinary gas pipes, and consumed by escaped from Libby prison. Gen. Butler has a burner just as our city gas is consumed. Without entering into details, we may state that the experiment was entirely successful, as the spacious rooms and halls of the Eastern Exchange were builliantly illuminated—every one expres-sing entire satisfaction with the light furnished, The Bugle Call .- This admirable collection and pronouncing it equal in all respects to the of the best patriotic songs should be in every famordinary city gas. The machine is so simple that it requires scarcely any attention, and the light has the advantages of cheapness, brilliancy, and freedom from all trouble. Any "Biddy The Pittsburgh Commercial has been purcan attend to it, who is competent to wind clock and fill a kettle. We have already given a description of the hotel, which is second to none hased by a company comprising some of the largest manufacturers and richest men of this in this section of the country, in point of arrangement and accommodation, and we congrat-ulate the gentlemanly proprietor, Mr. Wilson,

We are indebted to Mr. James T. Sample, of upon his success in having it lighted in so admi-Allegheny, one of the Sergeants-at-Arms of the rable a manner. He is determined, however, to combine all the comforts and conveniences of a Pennsylvania House of Representatives, for a city hotel, with the advantages of a first-class Summer resort. We are pleased to learn that the copy of the Annual Railroad Report of this State. otel, is now doing a good business, although i The Patriotic Glee Book .--- We have received s not yet fitted up and furnished. Mr. Huntley, the manager, is very efficient, and deservedly copy of this work from Mrs. C. Blume, 43

a copy of this work from Mrs. C. Blume, 43 Fifth Street. It is published by H. M. Higgins, of Chicago. The songs are full of that patriotic spirit which fires the hearts of our Union-loving by Jonathan Griffin, of West Meriden, Conn. A joint stock company has been formed here, under the recent act relating to corporations, with a capital of \$80,000, and it is proposed to intro-Last week, the largest gun in the world was

duce this new gas at once, as the cheapest light in the world. We have seen the house machines, uccessfully cast at the Fort Pitt Works in Pittsburgh. It will throw an elongated ball of half a at the rooms of the company in Lafayette Hall ton in weight, and a round shell of 750 pounds. ton in weight, and a round shell of 750 pounds. ers who feel interested in the matter to call and From 80 to 100 pounds of powder will be required examine the working models. Every gentleman who owns a country seat should have one of these machines, and no doubt will have one ere long. Manufacturers, both large and small, would economize largely by using this new gas. The machines are manufactured by Messrs. Foster & Co., corner of Penn and Stanwix Streets, who Business in Pittsburgh is active almost beond precedent. New foundries, engine shops, and iron works are in progress; while several of

and iron works are in progress; while several of the older establishments are enlarging. And the oil business now competes with the iron interest desire is an intelligent investigation of its mer its.—Gazette. A Convention was held at the Court House
