CAUTION TO PURCHASERS.

The wide demand for our CABINET ORGANS has induced dealers in some cases to advertise quite different in struments as CABINET ORGANS, and in others to represent to purchasers that Harmoniums and other reed organs are the same thing. «THIS IS NOT TRUE. The excellences of

which have given them their high reputation, arise not merely from the superiority of their workmanship, but also, in large measure from ESESNIAL DIFFERENCES IN CONSTRUC-ross, which being patented BY US, cannot be imitiated by other makers. From these arise their better quality and volume of tone, and capacity for expression. Every CABI-NET ORGAN has upon its name board in full, the words,

"MASON & HAMLIN CABINET ORGAN."

When a dealer represents any other instrument as a Gabl-inet Organ, it is usually a mere attempt to sell an inferior instrument on which he can make a larger profit. Prices of
