

Fire fighters busy Friendship reports

Friendship Fire Co., Mount Joy, answered two fire calls the weekend of March 22.

Firefighters doused a field fire Saturday, March 20, 12:37 P.M. on Garfield Road.

Thirty men responded and were in service thirty minutes.

At 12:08 P.M. Sunday, March 21, Friendship doused seven to ten spot fires from Nissley's Construction site, west of Salunga, to Newcomer Road east of Mount Joy.

The first fire was reported by a past fire chief Ray Myers who was on his way to the firehouse.

Before firemen could respond, two more fires were reported.

One engine responded to each call.

The other fires were spotted and extinguished by firefighters checking along the RR tracks.

The cause of the fires was a work train in the area.

The department was in service one hour with thirty men responding.

Libhart illustrations have been published

Illustrations by Henry Libhart, R.D. #1, Marietta, appear in "Lancaster County During the American Revolution," a Lancaster County Bicentennial

Committee publication.

Mr. Libhart, professor and chairman of the art department at Elizabethtown College, paints in a realistic style.

Death

A Mass of Angels was celebrated at the St. Peter's Roman Catholic Church for Kristy Lee Foehlinger, three-day-old daughter of Steven G. and Candice Groff Foehlinger, 649 East Market Street, Marietta, who died at the St. Joseph Hospital, Lancaster. Father John Smith was celebrant.

Besides her parents, she is survived by her paternal grandparents, Mr. and Mrs. Edward P. Foehlinger, Columbia; paternal great-grandmother, Mrs. Anna Murr, Lancaster; maternal grandparents, Mr. and Mrs. J. Robert Groff, and paternal great-grandmother, Mrs. Beatrice Rice, all of Marietta.

Need an Electric Water Heater Replacement?

HERE'S A CHANGE THAT MAKES SENSE

**WELL INSULATED
TO SAVE ENERGY**

**80-GALLON
CAPACITY**

**LOW
WATTAGE**

**THERMOSTAT SET
NO HIGHER THAN 140°**

Not all electric water heaters are the same. Some use more electricity than others. Why? Mainly because they come in different types and sizes.

Take an 80-gallon low-wattage tank for example. Who would ever believe that each year it can operate on less electricity than the smaller quick recovery type most commonly used. It's true! And the better the tank is insulated and the lower the temperature setting, the more economical it will be. What's more, while it reheats water at a slower rate, its larger size can deliver all the hot water your family will normally need.

It's something to think about at replacement time. After all, because water heaters serve the whole family, 24 hours a day all year round, they are big energy users.

Why are we telling you all this? To help hold electricity use down. We don't sell electric water heaters... it's just that if you have one that needs replacement, an 80-gallon, low-wattage tank would be a good choice for you!
