Donegal places high in science fair again

Donegal High School has again taken a large number of the prizes at the senior high school division of the Lancaster Science and Engineering Fair, held at McCaskey High School last week.

Donegal students won the top three places in biology, second and third place in

chemistry, and first and second place in earth science.

Three Donegal girls took the first three prizes in biology at the fair. Cheryl Felty won first place with her project entitled "The Dormancy in Cockerbur Seeds." The experiment showed that many environ-

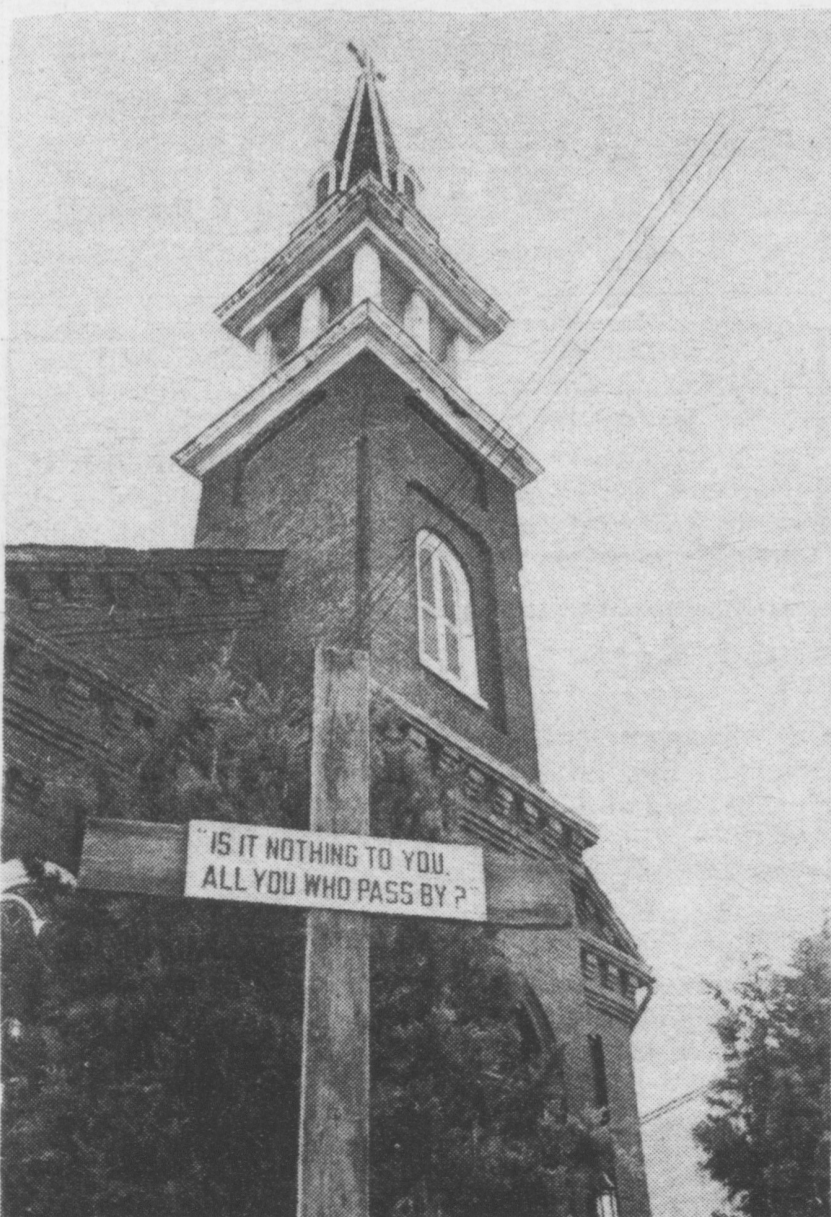

mental factors could cause dormancy in seeds. Cheryl is a senior and is the daughter of Mr. and Mrs. Wilbur Fuhrman, Marietta, R.D. 1.

The second place prize went to Donegal sophomore Becky Ruhl, daughter of Mrs. Charles Ruhl, Pinkerton Road, Mount Joy. Her experiment was called "Mineral-Pigment Relationships in Coleus." The third place prize in biology went to yet another Donegal girl, Eileen Penyak. Her project was "Effects of Ultra-violet Radiation on Bacteria-Antibiotic Relationships." Eileen is the daughter of Mr. and Mrs. John Penyak, 153 Fairview Ave., Marietta.

In the earth science section Donegal's Jeff Zimmerman won first place with his project entitled "Ethylene: An Air Pollutant." Jeff was the first student to win in this new science fair category. He pointed out that air pollution, especially ethylene pollution is very harmful to plants, causing such things as inhibited stem growth, increased stem diameter, and other losses of normal growth. He found that these toxic substances have a greater impact in darkness than in light. Jeff is the son of Mr. and Mrs. Earl Zimmerman Mount Joy, R.D. 2 and is a senior.

Steve Shope, a Donegal senior took second place in the earth science division. His project was called "Determination and Distribution of Pollutant Particu-

A large wooden cross outside St. John's Episcopal Church in Marietta reminds passersby of the reason we celebrate Easter.

Riley, Sload get JCs best award

From left to right are; Jaycees International Senator Clarence Alan Riley, president Don Simmons, and Jaycees International Senator William Ray Sload. Photo was taken at the Marietta Jaycee's annual induction ceremony at Mr. Lacy's Lounge last weekend.

Clarence Riley and William Sload received the highest award a Jaycee can attain, the J.C.I. Senatorship. The Senatorship is presented only to the extreme upper echelon of Jaycees who exemplify the service for which the organization is known. Only two other men, Albert Smith and Arthur Haines have attained this award in the 20 year history of the Marietta Jaycees. Clarence and Bill were honored at the annual Installation of Officers Banquet held at Mr. Lacy's Lounge in Marietta on Saturday, April 10, 1976.

Donald Simmons, a man with a long record of service, was installed as the 20th president along with the following Board members: William Sload, chair-

man of the board; Richard Sload, internal vice-president; Harvey Reem, internal director; Jay Risser, external vice-president; Richard Sipe, external director; John Spickler, secretary; James Wise, treasurer; David Gutshall, ways and means director; Richard Smedley, state director.

Incoming President Simmons, was awarded the highest annual award within the chapter, Jaycee of the Year. The outstanding first year Jaycee was Harvey Reem. Other awards presented were: Keyman of the Year, Jay Risser; Internal Project of the Year, Jordan Gmach; Internal Chairman of the Year, Jordan Gmach; External Project of the Year, Donald Pickle; External Chairman of the Year, John Spickler; Ways and Means

Project of the Year, James Yeaglin; Ways and Means Chairman of the Year, Richard Sload; Presidential Awards of Merit, Richard Sipe and Richard Smedley; Exhausted Rooster Award, Samuel Zuch.

The speaker for the evening was Philip Loht, one of PA's best known Jaycees and currently a candidate for the PA House of Representatives from the 97th District. Phil's career of public service has not only encompassed every facet of Jaycees, but he has also served with the Big Brothers and with other organizations helping the young and the handicapped. Recently, he was honored as Lancaster's outstanding young man for distinguished service to the community.

MJ boro auth. to use value engr.

Mount Joy Boro Authority has decided to use value engineering to help cut costs on their sewer treatment plant project.

The cost will be approximately \$16,000.00 and is 75% refundable from federal funding. Vartan Associates, Harrisburg, were awarded the contract.

The authority expects no delay in the project will be caused by value engineering.

In other business at the April 6 meeting, the authority gave permission to the borough manager, Joseph

Bateman, to send a letter to the National Standard Co. advising that company to not discharge untreated chemicals into the sewerage system. The authority has found a high content of the chemicals recently and said the amount is not allowable. The National Standard has been told before the chemicals should not be discharged into the system. The borough manager fears an overdose of the chemicals into the system could shut down the treatment plant for some time.

Bids for construction of an

earth lagoon and related work were received and the contract was awarded to B.R. Krieder and Son, Manheim. The firm's bid of \$9,390.00 was the lowest bid received. There were six bidders.

Investment banker Gordon Walker, of Butcher-Singer of Philadelphia, informed the authority on bond issues for the water and sewer projects planned by the borough, gave the authority an update on their project and asked for information from the engineers on timing schedules.
