Arbor Day at Grandview Elem.

by Judy Stoltzfus

Mrs. Rehrer's fourth grade class at Grandview presented a program to the students at Grandview on April 30, 1976. The master of ceremonies was Douglas Heisey. Scott Frantz told the students the History of Arbor Day. The Play, "Why the Evergreens Never Lose Their Leaves" was performed by Karen Grubb, Carol Haldeman, Dwight Yoder, Curtis Martin, Nan Williams, Ralph Martin.

Randy Heisey, and Scott Frantz. A choral poem was presented by Jamie Jones, Marcia Aspach, Lee Ann Kelly, Lillian Carns, Peggy Winters, Wayne Emenheiser, and Sherry Musser.

The Grandview Parent Teachers' Group decided to purchase a Tulip Poplar tree because George Washington planted a tulip poplar 200 years ago on his estate at Mount Vernon. The Bicentennial tree was dedicated by Scott Frantz.

Boy scout dinner held at E-town

by Robert W. Mark

Nursing at 2 p.m.

Miss Barbara May, daughter of Rev. and Mrs. William R. May, 60 West Walnut Street, Marietta, a former Donegal student, will be in this graduating class.

Need an Electric Water Heater Replacement?

HERE'S A CHANGE THAT MAKES SENSE

Not all electric water heaters are the same. Some use more electricity than others. Why? Mainly because they come in different types and sizes.

Take an 80-gallon low-wattage tank for example. Who would ever believe that each year it can operate on less electricity than the smaller quick recovery type most commonly used. It's true! And the better the tank is insulated and the lower the temperature setting, the more economical it will be. What's more, while it reheats water at a slower rate, its larger size can deliver all the hot water your family will normally need.

It's something to think about at replacement time. After all, because water heaters serve the whole family, 24 hours a day all year round, they are big energy users.

Why are we telling you all this? To help hold electricity use down. We don't sell electric water heaters . . . it's just that if you have one that needs replacement, an 80-gallon, low-wattage tank would be a good choice for you!
