Cancer screening

The Northwest Lancaster County Medical Association plans to conduct a free Hemocult Screening Program for early detection of colon and rectal cancer on Sunday, June 6, 1976 between 2 and 4 p.m. Interested persons can obtain kits from volunteers working in the lower level of the Association's building, just off Route 230 between Elizabethtown and Mount Joy, on June 6. The volunteers will explain the contents of the test kits and instruct each person in its use.

Cancer of the colon and rectum will strike 99,000 Americans this year, including 7,400 Pennsylvanians. This type of cancer occurs about equally in men and women, principally between the ages of 35 and 75. Over 49,000 Americans die of it annually. This mortality rate is unfortunate, since three out of four patients might be saved by early diagnosis and prompt treatment. For this reason the Northwest Lancaster County Medial Association in cooperation with the physicians in the Elizabethtown - Mount Joy area is conducting this simple screening program which can be conducted by each patient in the privacy of his home.

CHOICE BITS

Love your America, and love her wisely. Work to cure her faults, the mistakes under which she labors, work to bring her closer to the ideal that is the real America.

Be glad for your responsibility toward your country. Do not leave her to be ruled by a few who make it their business and profit to rule. Remember always — America is yours.

How may we be of service to you?
