FIFTEEN CENTS

## New supermarket coming to Marietta

Construction begins on the new supermarket behind Mr. Lacy's.

Excavation has begun for a one million dollar supermarket to be constructed on Route number 141 near 441 Marietta.

The supermarket will be operated by Supermarket Investors, Inc. The 90 by 100 feet structure will cover 9,000 square feet on a two acre plot. United Association of Groceries, Inc., will be consultant, developer and supplier for the store.

A spokesman for the developer said that local personnel will be employed. A name for the supermarket has not been chosen as yet. The projected date of completion is October.

The structure will have the latest Hall refrigeration and modern decor. It will carry a full line of groceries plus a bakery, and deli. The parking lot will accommodate 70 cars.

The store developers are group of Lancaster businessmen who plan to

develop a mini shopping center. "The area surveyed has a great potential for development," the spokesman said.

Swimmer makes a turn during race at Mount Joy pool.

## Mount Joy swimmers are best in division 3

Mount Joy swim team won the division 3 championship meet held at the Mount Joy pool last weekend.

See story on page 10 for details.

## Heart attack first aid course attracted only 2 students

It could happen anywhere, anytime. Suddenly, a friend, parent, child or spouse falls to the ground

unconscious. To your horror, you discover no breathing, perhaps no pulse. It could be a result of a heart

attack, electrical shock, drowning. The question is, what can you do? What would you do?

Most people, even if they didn't panic, would probably phone for an ambulance right away...but the stricken person could die while they were on the phone.

Area residents had an opportunity to learn the proper procedure last Tuesday night, when the Maytown Fire Company offered a mini-course in Cardio-Pulmonary Resuscitation. Only two people showed up.

Cardio-Pulmonary Resuscitation, or CPR, is some-

thing that every person who values human life should be familiar with. It is simple, requires no equipment, and can prevent death or permanent brain damage in many emergency situations.
