

Guidance counselors are honored

A lunch of appreciation for area high school guidance counselors was held at the Mount Joy Vo-Tech on October 21st. The luncheon was held by U.S. Air Force Recruiting Detachment 108 to honor the guidance counselors for their help in getting information on the Air Force to interested applicants.

Captain Douglas J. McLean presented certificates of appreciation to Mr. John Day (Donegal High guidance counselor) and Mrs. Lily Grimm (a former guidance counselor).

Donegal singers in county chorus

Twelve members of Donegal High School chorus have placed in the county chorus which will be held at Cocalico High School on February 19. All members who auditioned for county chorus are eligible to try

out for District chorus on November 13, at Hempfield High School.

These persons have earned the following chairs, Cindy Charles—6th; Jenny Kohler—10th; Tracie Hoffman—18th; Margaret

Endslow—23rd; Keith Gephart—4th; Phil Good—9th; Pat Kenney—22th; Holly Baker—12th; Becky Zimmerman—16th; Jim Johnson—13th; Jolene Lindemuth—19; and alternate Joi Shearer.

STEAM VAPORIZERS

Steam Vaporizers — from \$8.98

1. "Why do we need them?"

To add moisture to dry indoor air, to relieve the discomfort most commonly associated with respiratory ailments. And because they're portable—they can go where you go to give you the maximum relief.

2. "Are there any other reasons to have them?"

There sure are! . . . More and more people today are recognizing the benefits of properly humidified air as an aid to prevent dry, itchy morning throat, bothersome static electricity, and to prevent even your house plants, furniture and rugs from drying out. Plus, by maintaining proper moisture in the air you'll be more comfortable at lower temperatures. You'll be able to save on costly fuel bills because moist air is economically heated.

COOL VAPOR HUMIDIFIERS

Cool Vapor Humidifiers — from \$13.95

3. "What's the difference between a "cool spray" humidifier and a hot steam vaporizer?"

A "cool spray" humidifier adds moisture to the air by breaking down water into very minute particles—mist. . . and because these particles are so fine they are absorbed into the air as quickly as they are blown out of the humidifier.

A hot steam vaporizer, a product very similar to that which your grandmother used, adds moisture to the air by steaming the water, much like a tea kettle steams water.
