5 ways to Save on your phone bill (Part 1)

1. By carefully selecting locations, styles and colors of phones when you first have your phones installed, you can avoid paying extra installation charges. Changing the location or color of a phone will mean another visit and extra charges.

2. Know the different types of service offered by your United Telephone Company. Our business office representatives will be glad to explain them to you.

3. You'll want to learn the specific rates and charges you can expect. Our business office representative can explain regular monthly and one-time-only charges.

4. You may be asked to pay a deposit when you order phone service if you have not yet established credit or have never had a phone in your name. Of course, we don't like to keep that money for a long time. If you pay your phone bills on time, we'll return that deposit WITH interest.

5. Report any service interruptions to your repair service center promptly. You will receive credit, when applicable, that will be applied to your account. Repair Service numbers are conveniently listed in the front of your telephone directory.

This advertisement is first in a series of helpful and cost saving tips from your United Telephone Company to help you save money. (And everyone knows saving money is not easy these days.)
