This bulletin board, which we saw at DHS, is a rather unique way of announcing a business class.

Some people never forget a face. Now some telephones never forget a number.

Some people never forget a face. But how many of us remember phone numbers? Even important numbers? That's why there are little black books and big thick telephone directories. But alas, little black books always seem to be a year or two out of date. And telephone directories aren't always where you remember putting them. Fortunately, United Telephone has introduced TeleDialer 32.

ELECTRONIC TELEPHONE DIRECTORY

TeleDialer 32 is an electronic telephone directory that remembers up to 32 numbers for you.

All you have to do is record the number you want to remember. Then, whenever you want to call a recorded number, simply push the appropriate button and your call is speeded to completion.

YOUR PERSONAL OR EMERGENCY NUMBERS

Just push one of four special emergency buttons and you can quickly and automatically reach the police, fire department, family physician, ambulance service or any other emergency number. For example, if you are going out for the evening where you can be reached. Then just tell the babysitter to press the appropriate button if she needs you.

WHAT A MEMORY

When you place a call the number is automatically remembered. If you want to repeat the call, all you have to do is press the "last number dialed" button.

FOR YOUR HOME OR BUSINESS

It's low cost and many special features make it a useful communications tool for salesmen, purchasing agents, secretaries, professionals, and shop owners.

And, for the home, TeleDialer 32 is like having a personal secretary placing calls to family, friends, shops, schools, beauty parlors, etc.

For the full story of TeleDialer 32 just contact your local United Telephone business office today.
