5 more ways to Save on your phone bill (Part 4)

16. The time at the calling point determines the applicable rate period for long distance calls. Save money on these calls, including Overseas calls, by referring to your call guide in the front of your telephone directory for the most economical rate period.

17. Want to avoid excessive long distance charges in general? Try timing your calls, so you can "say it all" without overtime charges. To help you, just jot down the things you would like to discuss.

18. Before you place a long distance call to a business, check to see if they have a toll-free number. You can recognize it because it has an 800 prefix instead of a regular area code. If they have one, it's usually displayed in their advertising, or you may find it listed in your own local telephone directory. If so, the call's on them, and you save.

19. The information pages at the front of your local telephone book are a good source for tips on how to place your calls and how to save time and money in using your telephone. Look in the book, and save.

20. If a coin phone takes your money but doesn't give you your call, you're, of course, entitled to a refund. Just find a phone that works, dial "Operator" and tell her what happened. We'll send you a refund in the mail. (We'd also appreciate it if you'd tell the operator the telephone number and location of the phone that's out of order so we can get it fixed as soon as possible.)

This advertisement is another in a series of helpful and cost saving tips from your United Telephone Company to help you save money. (And everyone knows saving money is not easy these days).
