more ways to Save on your phone bill (Part 2)

Money seems too hard to hold on to these days. Why not make it work better for you. Follow our continuing series on ways to save on your phone bill.

G. Have you reached a wrong number when you've dialed a long distance number? Don't just hang up and grumble about it. Ask the answering party the area code and the number you reached in error. Then call the operator and tell her what happened. The operator will initiate a credit for you.

H. Have you been cut off from your party in the middle of your conversation? Or did you have a noisy connection? Don't just hang up and call back. Call the operator and report the problem. The operator will credit you for the time your call was interrupted.

I. Did you get charged for a long distance call you never made? Call your United Telephone business office and our service representative will have the charged removed.

J. Dial your own long distance numbers direct. That's the cheapest way. When you talk with anyone who answers you are charged a lower rate than when the operator completes your person-to-person call.

K. You know dialing direct is the least expensive way. But what if you don't know the number in that distant city? Simply dial your long distance access code, the area code (if required) and 555-1212 for directory assistance. There's no charge.

L. A listing of all area codes can be found in the front of your phone book. Save yourself some time later on by recording the new number in a personal number book. Stop at one of our business offices or phone shops^{T.M.} and ask for a personal phone book.
