BANK WITH FRIENDS AND NEIGHBORS

We're your Community Bank. We're locally owned and locally managed. We're not part of any large banking system. We're independent. We work for this area, and this area, alone.

Our employees both live and work in your community. When you use our bank you are being served by neighborhood people. It's our job to see that you receive individual attention, the kind of personal attention you would expect from a neighbor.

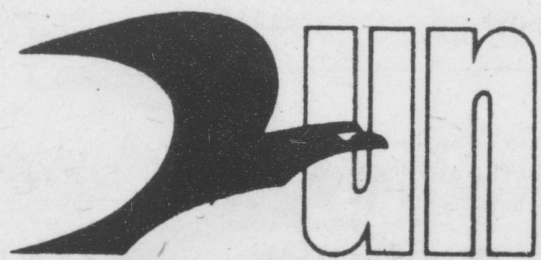

Our officers and directors are actively involved in local organizations and affairs. Our staff takes a personal interest in the financial well-being of each and every member of our community.

When you save with us, a good portion of your deposits are used for personal loans for home improvements, new cars, medical expenses, and more, to help all the people in our community.

A good portion of your deposits are used for commercial loans to help local businesses grow which, in turn, helps create local jobs. We supply mortgage and rebuilding money to revitalize our commercial and industrial areas.

As your Independent Community Bank, we put your money to work for a better local economy. **We put your money to work for you.**

United Tel was busy during TMI week

The United Telephone Company, along with Bell of Pennsylvania, had their hands full during the TMI incident. Bell services the reactor island itself, while United provides phones to the observation center, which has been the headquarters of Met Ed, the NRC, and the news media since the accident started.

Within five days of the initial problems on March 28th, United Tel's service to the observation center had grown from two phone circuits to 137. Four lines were installed on March 28th; on the 29th there were 15 United Tel installers working, on a volunteer basis, nearly 24 hours a day; by Friday night there were more than 20 lines in service. 8000 feet of cable were laid there on Sunday.

With the cooperation of AT&T, United provided lines to Harrisburg, Washington, and other cities.

More special arrangements had to be made for president Carter's visit.

In addition to this, regular phone users placed up to three times the normal number of calls, and United Tel was also busy helping to set up evacuation plans, buying radiation clothing and respirators for employees who volunteered to stay during the evacuation, and making emergency plans to relocate company headquarters in Chambersburg.
