

Beware Elizabethtown! Despite last week's loss to Columbia, Indians' spirit, teamwork never faltered, Team made very few mistakes

E-town, beware. Donegal's 14-game winning streak may have snapped last week, under the impact of a surprisingly good Columbia attack, but the Indians' spirit and teamwork never faltered.

The Columbia game was the first test of this year's young and inexperienced Indian football team, and, in spite of the 14-6 loss, the signs were encouraging.

Considering that the Indians are fielding only three lettermen from last year's championship squad, the team made a minimum of mistakes, particularly on defense. The conspicuous absence of "big plays" by the Red Tide demonstrated that the Indian defenders know how to play their positions.

Admittedly, Columbia didn't need any 50-yard runs to win. Their giant offensive line had enough bulk (including 280-lb. Mike Hank) to open holes in the tough by relatively light-weight Indian defense. This year's Tide should be re-named the Columbia

Moose, in honor of those linemen. Having survived Columbia's line, the Indians may feel as if they have switched to non-contact sport when they encounter the rest of the teams on the schedule.

Although Columbia's massive line made running up the middle an exercise in futility, the Indians demonstrated that they will be an aerial threat this year. Quarterback Craig Lehman's 62-yard touchdown pass to Steve Meszaros was the evening's most spectacular demonstration of passing prowess. In combination with the improved running game which is almost certain to appear next week, the Indian passing game should be a deadly weapon this year.

This week, the Indians are sharpening their tomahawks in preparation for Friday night's encounter with the E-town Bears. With more of the same hustle and teamwork they demonstrated last week, the Indians have a good chance to bring home a bearskin rug.

Quarterback Craig Lehman [#12] uncorks a pass. One of Lehman's bombs connected with running back Steve Meszaros for a 62-yard TD.

Columbia's monster linemen broke up a lot of Indian plays before they got started: but against less incredibly massive teams, the Indian running game should be impressive.

For years, we'd been hearing rumors about the guy. Some said he lived in Mount Joy, but was planning to move. Others said he was already gone.

They had different names for him: "The Wizzard," "Mr Infallible." "Doktor Predicto."

People mentioned his various aliases in hoarse whispers. No details were

ever given: no address, no telephone number.

Dr. Predicto didn't go around revealing his information to just anyone. He was secretive, elusive, mysterious.

But he knew. Everyone who had seen his handwritten predictions agreed that Dr. Predicto knew who was going to win the L-L Football League.

The Susquehanna Times

sports editor, after solemnly swearing that he would never reveal Dr. Predicto's identity to anyone, finally obtained a copy of the closely-guarded list. It is reproduced above.

"You must be nuts," the sports editor told Predicto. "You've got Donegal in 4th place."

"I use mathematics, not
