"We compared phone systems and chose United Telephone"

Left Vernon Trimble and Roger F. Ecolono, co-owners Greencastle Ford.

Growth is an important objective of a progressive business. Greencastle Ford's highly competitive co-owner Roger Ecolono quickly realized however, "That our firm's rapid growth was placing a strain on our telephone system".

Roger called Jean Trace, United's area Sales Representative. United's professionals evaluated the existing telephone system and worked with the people at Greencastle Ford to determine their individual requirements. An automatic dialer with a capacity of 1000 pre-selected telephone numbers became part of a solution to Roger's particular problem.

The United Telephone Company, drawing on its extensive experience and resources, was also able to offer Greencastle Ford management the choice of expanding the existing telephone system or replacing it with an advanced electronic system.
