## Sophomores to be tested at Donegal

On Tuesday, October 7, 1980, the Guidance Counselors of Donegal High School will administer the National Educational Development Tests to all 10th grade students. This program is especially concerned with the students' ability to use what they have learned.

Results from a single program do not, of course, provide the sole basis for important decisions; however, the NEDT results do afford significant pieces of information that are of value in assessing educational needs and plans. The results will help the school recognize the strengths in each students' educational development and, at the same time, will pinpoint weaknesses. The NEDT program provides the school with the type of information it needs to help students make realistic decisions.

Booklets describing the test and giving sample questions will be sent home with students prior to taking the tests. When the results are received the counselors will interpret the results to the students and each student will receive a copy of his or her personal scores.
