

THE SPY & REGISTER.

SATURDAY MORNING, April 1, 1848.

AGENCIES. V. B. PALMER is duly authorized to receive subscriptions and advertisements for this paper...

The office of the Columbia Spy has been removed to the building lately occupied by Mr. Raulo, on Front street.

The canal is now in good order from Columbia to Pittsburg. One or two breaches occurred last week near Hollidaysburg, which were immediately repaired.

LUMBER.—Our wharves are beginning to be lined with lumber, which we understand, commands a good price this season, owing to its scarcity...

The Legislature has agreed to adjourn on the 11th of April—making 99 days of the Session.

LANGFELD, the supposed murderer of Mrs. Rademacher, in Philadelphia, has been committed to take his trial at the April term.

A WARNING TO CALLITHUMPHANS.—We observe by the papers that Isaac Barker, of Tiverton, who was indicted for shooting Samuel Negus, has been acquitted...

This mode of annoying citizens who have just committed matrimony, might as well be dispensed with for all the benefit it accomplishes...

LITERARY NOTICES.

Those of our readers who are interested in the sciences of Pterology and Physiology, are referred to the list of books published by Fowlers & Wells, New York...

LITTLE'S LIVING AGE.—This week commences a new volume of this sterling periodical, and now is a good time to subscribe.

THE HOME JOURNAL.—Messrs. Morris & Willis announces the immediate publication in the Home Journal, of another beautiful American Novel...

THE LIFE AND PUBLIC SERVICES OF HENRY CLAY.—Greely & McClrath have just published a volume with the above title, from the pen of Esq. Sargent, Esq., in which the events are brought down to the year 1848.

THE CITY ITEM.—Friend Fitz, you flatter. Help to exchange "diamonds" for gems like the City Item, however: jewels are our weakness.

THE COLUMBIA REV.—This handsome little paper has passed into the competent hands of our friend Wessbrook, who will make it sparkle like a diamond of the first water.

THE UNION MAGAZINE for April is on our table. A humorous Mezzotint of "The Lost Glove," a fine line engraving, entitled "Memory," and a superb fashion plate, are its principal embellishments.

DR. COOLIDGE has been convicted of the murder of Mr. Mathews, and sentenced to be hung in one year, should the Governor of Maine see fit to issue a warrant at the end of that time.

NEW COUNTERFEITS.—Chauteau County Bank, Jamestown, N. Y.—A letter A. Vignette, female with one arm resting on a shield. Impression pale, and execution miserable.

ERIE BANK, Erie, Pa.—1's. Purport to be notes payable on demand. 2's. This bank has never issued notes under 5's, except Relief notes.—Bick Rep.

DIVISION OF LABOR.—According to the following estimate of the division of the occupations of men in the United States, it seems that there are three and a half times more men engaged in agricultural than in all other pursuits.

Who is guilty of the following? What dose of medicine does a man take when his daughter is naughty? Don't you know? Why, he takes an aliar? [He takes and he licks her.]

Correspondence.

For the Columbia Spy.

MR. EDITOR.—As your sheet is chiefly devoted to literature, a few remarks on education will doubtless find admittance into its columns. This, indeed, a subject that should ever be kept before the eyes of the public, as there is, perhaps, nothing of more importance to man and which has a more direct bearing on his happiness, than the cultivation of the mental faculties and the acquisition of substantial knowledge.

THE FACILITIES of the mind bear a close analogy to the powers of the physical frame. It is a law in the animal economy that the action and power of an organ are commensurate, to a great extent, with the demand made upon it.

Such a mind is able to make us a solid judgment, to decide with promptness and to act with energy. Since, then, the cultivation of the mind is the thing most desirable and not the mere treasuring up of facts in the memory, the question, what are the means best adapted to develop and invigorate the mental activities? naturally suggests itself.

PARISIAN MELANGE.—The wife is a true one, that "man proposes and God disposes," as the following fact will show: King Louis Philippe, (that was under the name of the Duke of Orléans) had a young son some time ago of going to Pau the coming spring.

GRAVITATION OF THE ELECTRIC FLUID.—Mr. Lake, of the Royal Laboratory, Portsmouth, has communicated to the lancet the singular experiment, which appears to show that electricity, when applied to a fluid, really acts as a gravitating agent.

DAUERRETYPE DISCOVERY.—It is well known that the edge of the sharpest and most polished lancet, looks as blunt as the back of a case knife, and as jagged as a saw, in viewing it through a microscope.

WANTED.—One hundred and seventy-five young men of all shapes and sizes, from the tall graceful dandy, with hair enough upon his upper lip to stuff a cushion, down to the beardless pup.

MR. EDITOR.—I clip the above from the Philadelphia North American of this day, and hand it to you for publication, thinking that probably Columbia can furnish a large delegation if not the full number required for the Gaping Corps.

ALPHONSE DE LAMARTINE.—The notices by the Calcutta make this statement poet the life and soul of the great movement by which France promises to be made a Republic, in the most liberal sense.

HYDRAULIC TELEGRAPH.—We lately inspected a new species of telegraph, produced from the action of water, patented by Mr. Jovett, which appears to us very simple and ingenious, and is likely to excite some attention, both from its own merits and from the interest which is taken in this means of communication at present.

A pressure exerted on the liquid at one end of the tube will be communicated to any surface in contact with the liquid at the other end, whether the tube between the two extremities be straight, curved or angular, or whether it pass upwards, downwards, or in an oblique or horizontal direction.

It seems to us that this is the picture of a great statesman—a genuine republican—a high-souled and disinterested patriot. France has many, very many, great minds in her cabinet of intellectual jewels; but none of them outshines the lofty intellect and intrepid integrity of the man who has just been named.

AS AT AUGUSTA, MAINE, When Dr. Coolidge was asked if he had anything to say wry sentence of death should not be pronounced upon him for the murder of which he had been committed, he replied:—

THE PRINCE OF MONACO.—The wife is a true one, that "man proposes and God disposes," as the following fact will show: King Louis Philippe, (that was under the name of the Duke of Orléans) had a young son some time ago of going to Pau the coming spring.

GRAVITATION OF THE ELECTRIC FLUID.—Mr. Lake, of the Royal Laboratory, Portsmouth, has communicated to the lancet the singular experiment, which appears to show that electricity, when applied to a fluid, really acts as a gravitating agent.

DAUERRETYPE DISCOVERY.—It is well known that the edge of the sharpest and most polished lancet, looks as blunt as the back of a case knife, and as jagged as a saw, in viewing it through a microscope.

WANTED.—One hundred and seventy-five young men of all shapes and sizes, from the tall graceful dandy, with hair enough upon his upper lip to stuff a cushion, down to the beardless pup.

MR. ALLEN, of the United States Senate, uttered in debate, a few days since, what he called a great truth, and he rightly so designated it.

THE NEW YORK EXPRESS says of Bennett the cricketer, who went out in the Cambria—His devotedness to cricket partakes in its intensity of the romantic, if not, indeed, of the marvellous and miraculously.

FREE TRANSLATIONS.—A Parisian author has translated Shakespeare's line: "Out, brief candle! This is but a dream, that is the translation of an exclamation of Milton's by a Frenchman, who rendered "Hail horrors—hail, thus: "How d'ye do, horrors—how d'ye do?"

A BISHOP APPOINT.—It is intended, says the Globe, to found a bishopric somewhere in the Chinese seas. Britannia has long had a patent for ruling the waves temporarily; but now, it seems we are to reduce them under spiritual domination.

IMAGE OF THE SUN.—Mr. Becquerel has announced to the Academy of Sciences, at Paris, that the image of the sun, which is obtained on a plate of silver properly prepared. The preparation consists in submitting cautiously the plate to the action of chlorine.

ALL THE FOLLOWING articles which have obtained unbounded popularity, are now in stock at the Dispensary of the Columbia Spy, and by James S. Lancaster, and John J. Libhart, Merckle & Co., 109 Race Street, Philadelphia.

CONNELL'S MAGNETIC JAR EXTRACTOR.—It is now conceded by medical men that Connell's Magnetic Jar Extractor, manufactured by Connell & Co., New York and London, is the greatest wonder of the 19th century.

DR. SWANEY'S HEADACHE REMEDY.—Why will you suffer with this distressing complaint when a remedy is offered that will not fail to cure you? This remedy will effectually destroy all attacks of headache, either nervous or bilious.

MOTHER'S RELIEF.—Indian Discovery.—An extract to be used by mothers and nurses to avoid the Pains, Dangers and Discomforts of Child-bearing, are earnestly entreated to calm their fears, allay their nervousness and soothe their hearts by the use of this most extraordinary and virtuous medicine.

BINGHAM'S LINE AGAIN!—It will be seen from this notice that Bingham's Line has had the first Boats in from Hollidaysburg and first goods through from Pittsburg this Spring.

SWIMMING OF THE HEAD like every other disorder ordered motion of the head, owing to CRURAL and unequal humors which, when floating in the general mass of the circulation, are the cause of headache, giddiness, palpitation of the heart, and other unpleasant symptoms.

TESTIMONY OF THE DOCTORS in favor of Wistar's Balsam of Wild Cherry.—This certifies that I have recommended the use of Dr. Wistar's Balsam of Wild Cherry in all cases of the Lung, for two years past, and many bottles of my knowledge have been used by my patients, all with beneficial results.

ROADWAY'S CHINESE MEDICATED SOAP.—Patented by thousands of individuals throughout the United States and Canada, giving the most flattering testimony to all who have used it, and who have cured every one of its mysterious effects.

PHYSICIAN'S TESTIMONY.—Testimony is now received from all quarters of the Globe. The following letters are presented in relation to the medical value of DR. SWANEY'S COMPOUND SYRUP OF WILD CHERRY.

DR. SWANEY'S HEADACHE REMEDY.—Having used your Compound Syrup of Wild Cherry, extensively in my practice, I am pleased to say, that it has cured every one of its mysterious effects, and who have cured every one of its mysterious effects.

DR. SWANEY'S HEADACHE REMEDY.—Having used your Compound Syrup of Wild Cherry, extensively in my practice, I am pleased to say, that it has cured every one of its mysterious effects, and who have cured every one of its mysterious effects.
