Four Boys Drowned at Long Branch.

New York (Special) .--- Four boys between the ages of 10 and 15 years were drowned at Long Branch. N. J. The boys were on a raft quite a distance from the shore, and were swept into the sea by the waves.

Not long after they entered the water young Bouse, a companion, swam ashore and shouted that his . companions had been drowned. The five had reached a rait which was anchored some distance out in front of Cranmer's Beach, and while on it had been swept into the sea by some big waves which poured over them. The accident was unseen by the hundreds of bathers who were disporting in the surf, and was not until Bouse gave the alarm

that it became known.

He is satisfied that although among a certain class there is some discontent on account of the land tax, which is not yet understood, this class is not likely to foment trouble. Many army officers express themselves

as gratified at the increase in the military force. They think that, with the military guard withdrawn from the prison, an other uprising there might result in the release of some 1800 prisoners. This possibility is regarded as a menace to the city by those who take that view of the case, as they regard the white guard as insufficient. Civil officials look upon this contingen-

cy as unlikely, inasmuch as the 600 white police could mobolize at the prison before any of the prisoners could escape and become dispersed throughout the disaffected district.

TENTS TORN BY HIGH WIND.

New Town in Oklahoma Swept by a Storm -Two Killed.

Anadarko, Okla. (Special) .- Two persons were killed, two seriously and a number slightly injured in a heavy wind and rainstorm which visited this place. Twenty buildings were almost wrecked, hundreds of tents (occupied by homesteaders) were torn to pieces and great quantities of merchanidse was strewn far and wide over the prairie.

Anadarko is one of the three towns which sprang up after the opening recently by lottery of the Kiowa-Comanche Indian reservation. Alter the draw-inl had been concluded thousands of homesteaders, many of whom failed to win in the drawing, rushed thither and purchased town lots which were being auctioned off by the government. In less than 30 days the town had reached over 6000 in population.

When the storm came 20 of the halffinised houses were torn to pieces. Flying timbers caused the fatalities noted. while the wind swept the tents into a conglomerate mass and the rain soaked thousands of dollars worth of merchandise.

Conciliatory Committee to Present Certain Propositions of the Amalgamated Association to the Steel Corporation-The Proposals Said to Contain Concessions by the Strikers-Direct Negotiations.

Pittsburg, Pa. (Special).—In further-ance of the "peace" program, which is said to have been in the course of preparation for several days, it is now given out by one on the inside, and one who should know, that the Amalgamated executives have consented to have certain propositions made to the officials of the United States Steel Corporation through members of the conciliatory committee of the National Civic Federation, which proposals are expected to bring about a settlement of the great strike. Those interested in the matter are waiting for word to proceed with the program as outlined at the conference of Amalgamated executives and the concilatory committee of the Civil Federation. The propositions, which are to be taken to New York carry certain concesions by the Amalgamated officials which it is hoped will pave the way for the reopen ing of direct negotiations between the association and the company.

The proposition carries the terms un der which President Shaffer and his ad visors stand willing to settle. What these terms are and the mode of their presentation are carefully guarded secrets. There is alone the implication that they contain concessions of such importance that those in interest expect the corporation to drop its adverse attitude and reopen negotiations.

The proposal contains nothing looking to arbitration. This mode of settlement was waived on the advice of the Civic ederation men.

While the conferees were discussing peace plans the Amalgamated men were shown the impracticability of sympathetic strikes by the miners and other organized men affiliated with the American Federation of Labor.

Mosquito hunters will follow with interest the experiments that are being made in New Orleans, where the mosquitoes flourish practically all the year around. Oil has become very cheap in that city since the opening of the Texas fields, and it has been decided to try to do two things at once-lay the dust in the streets and kill the mosquitoes. Railroads have tried sprinkling their roads with crude oil, and have found this method most efficient in permanently laying the dust. New Orleans is trying the same thing, and it is said to be as successful in streets used for traffic as it is on railways. Most of New Orleans mosquitoes are bred in open drains and cisterns, and while the streets are being sprinkled oil is put on the neighboring drains.
