Pneumonia always results from a cold or from influenza (grip), and it has been shown that this remedy counteracts any of these diseases toward pneumonia. It has been fully proven in many cases in which this remedy has been used during the great prevalence of grip in recent years, and can be used with implicit confidence. It results from a slight cold which is not apprehended until it is advanced to a stage where there is fever and chills and pains in the chest. It is announced that the patient should be on the safe side and take Chamberlain's Cough Remedy as soon as a cold is contracted. It always cures pneumonia. S.
