Regular excursion tickets at usual rates will be sold from the points named above and from all intermediate points to Atlantic City.

What Sing a Song of Sixpence Means You all know this rhyme, but have

you ever heard what it really means? The four-and-twenty blackbirds represent the twenty-four hours. The bottom of the pie is the world, while the top crust is the sky that overarches it. The opening of the pie is the day dawn, when the birds begin to sing, and surely such a sight is fit for a king.

The king, who is represented sitting in his parlor, counting out his money, is the sun, while the gold pieces that slip through his fingers are the golden sunbeams. The queen who sits in the parlor, is the moon, and the honey is the

The industrious maid, who is in the garden at work before her king-the sun -has arisen is the day dawn, and the clothes she hangs out are the clouds. The bird who ends the song by nipping off her nose is the sunset. So we have the whole day, if not in a nutshell, in a

NEWTOWN.

Preaching services were held on Sunday afternoon here by the Rev. Breneman the pastor in charge. Services again next Sunday morning after Sunday School.

Charles Hoffer, while attempting to get on a wagon driven by Milton Erb, missed his foot hold, and the wheel of the heavy wagon passed over both feet, crushing the part of the one, and badly bruising the other. He is confined to the house

being unable to walk. On Saturday afternoon the River Brethren of the Donegal District, held their baptismal services at Amos 8 Mill, where seventeen were bap the waters of Chickies creek. (day morning the same depor are stuck observ

ESTATE NOTICES!

Much More Effective Even Than Hand Hoeing We have a cultivator that we feel sure will be a great success for cultivating and hoeing corn, potatoes and tobacco as our transplanter has been for setting plants. Cultivates between the plants or hills in the row as well as between the rows. Cultivates between the plants and kills the weeds when plants or hills are not closer than twelve inches. One man does the whole business when the team is well trained. If not well trained, better have a boy to drive.

Best Tool for Cultivating Tobacco Ever Made

Six acres is a day's work in tobacco when the plants are twelve inches apart on the row. This machine is just as valuable to cultivate tobacco, potatoes, cabbage, corn, and fact anything that needs cultivation.

ment than will be done by hand hoeing or any vator made. This is simple and easily operated, easily attached and detatched and invaluable to at grower of tobacco.

A Testimonial

Lancaster, Pa., September 12, 1903. It gives me great pleasure to give a testimonial on such a useful pleee of farm machinery as the tobacco hoer. I bought one for my farm in Manor township, on the solicitation of M. L. Greider in 1900, and I found in far greater than he recommended it to be. I used it as a cultivator for corn, potatoes and tobacco. It saved so much man labor, that I bought a second one this year. We form 30 areas of tobacco and town of these work of these cultivators. farm 30 acres of tobacco and owe to the work of these cultivators the opportunity of farming so large a crop of tobacco. This machine does its work far superior to any other harrow or cultivator I have ever seen. I would advise every tobacco farmer to have
