You may talk as much as you please, call it a mud hole as often as you like or say anything else about it but our subside is "all to the mustard." Nearly all last week we were obliged to drink water which was so dirty that it formed a coat of rust on one's stomach. This was due to the fact that the sub basin was given a cleaning and water had to be pumped direct from the dam to the reservoir. This is the first time we have had muddy water of any account for a long time.
