Would Make Vagrants Work

In his recent report to the county Commissioners, County Controller Eshleman recommends that vagrants at the prison be compelled to work. There is a stone quarry on the county farm and the Controller thinks that the bums should be used in operating the same. In this manner they would assist to defray the expenses of keeping and save several thousands of dollars to the county annually.

Buying of the new leaf tobacco crop of Lancaster county may now be said to have fairly opened, though not many of the local packers are among the buyers. Representatives of the big foreign combinations have again as during the past few years started the buying. The local packers say they are in no hurry to buy, as there will be enough to go around. As they are frich's hotel in Ironville on Friday, still loaded up with 1906 tobacco, it is doubtful if many could buy if Plain suits as low as \$7.50 differ- they would, having no warehouse ent patterns at Martin's-Eby's old room, to say nothing of other potential reasons. There are some farmers who take this medicine with wry face. They were paid 16 cents last year, and they claim this year's crop is just as good. If they would reflect a moment and consider that much of that high priced tobacco is still in the warehouses and is unsaleable because of the price packers must ask to get out whole, they would not blame the buyer for this year's crop. At the price offered farmers are getting more for the crop than town. for any other raised on the farm. It looks as if there would be very active buying the remainder of this Brethren church on Sunday evenmonth, and that the warehouses would be open to receive tobacco before March 1. That numbers of growers are not satisfied with the prices now offered is evidenced by at the property of his son Charles. the reports of the purchase of tobacco cases by growers who intend to pack their own crops, expecting to get more out of them that way.
