Does Not Contain Any Acid Cleanses, Vuitens and Blues in one operation, thus saving labor two-thirds. A tholough germicide and deoderant destroying the disagreeable odor due to perspiration and imparting a freshness and whiteness unknown to laundry washed in the old way. Guaranteed not to rot or injure the most delicate fabrics, and will save one-half the cost of white wear due to engless rubbing of the wash-board. Without a doubt a single trial will be sufficient to give them a hearty endorsement and continued use of sheart.

single trial will be sufficient to give them a hearty endorsement and continued use of them. It is not a soap but a combination of the best and most harmless cleansing agents known to modern chemistry.

5 Points of Merit 5 1-It will do the washing cleaner, quicker and better than is commonly done and does not interfere with the housework.

Simply put on and boil. 2-It makes the laundry a pure snowy white without the ad-

dition of bluing. 3-Positively no stained, streaky or rotted clothes.

4-It is a germicide and deoderant killing all germs and unpleasant odors. 5-It will whiten your bed-spreads, linens, laces and garments

that have been yellowed by age. **CAUTION:** Be sure and get the genuine GEMLAUNDRY TABLETS. Accept no substitute as the market is rapidly being flooded with imitations—the sincerest flattery possible to an honest preparation. There is none "just as good" For Sale by

would lead the conversation to the latest novel—quite the easiest of conversational openings between strangers, who lay their heads together over the menu and have to entertain each other for an hour. You are interested in the description of the book of the hour, you are a little ashamed of not having read it, and going home you sit down and order the book-from the circulating library. Every publisher, every theater manager, every deviser of a patent medicine knows that the advice of a friend is a more concentrated and personal pull than the opinion of a critic from the empyrean. And if the idea was ever carried out, it deserved to succeed, but no one ever spotted the paid diner-but. There was the artistry of the thing.

A recent bulletin of the department of agriculture says: "It appears that practically all soils contain sufficient plant sood for good crop yield; that this supply will be indefinitely maintained, and that this actual yield of plants adapted to the soil depends mainly, under favorable sonditions, upon the cultural methods and suitable crop rotation."
