SOME USEFUL INFORMATION FOR FARMERS—READ IT

A Combination of Crops That Pay Big—Feed the Crops at Home—Spraying of Trees Kills Birds—Curing Gapes—Get Rid of Mice.
 Mississippi boasts of one county in which every white boy of school age is working a piece of ground with his own hands as a part of his education. If more boys were mixing some of this work in the soil with what they get from books, they would develop into more wholesome and useful members of society.
 A Wisconsin poultryman recommends placing chickens afflicted with gapes in a barrel in which a quantity of slacked lime has been scattered, his contention being that, in its effort to fly out, the chicken will stir up and breathe in enough lime dust to kill the gape worm which may be sneezed out. Care should be used that the chickens treated are not less than half grown.
 The number of mice which will be on hand to threaten orchard trees when the winter snows are deep may be materially reduced if piles of mulch, hay or other litter are removed about this time. Many of these piles of litter will be found to contain nests of from five to eight little naked, squirming mice which are very easily dispatched. The writer remembers removing some ten or more crows of grass from the orchard about the time mentioned and in almost every pile there were just such a bunch of little mice, which would have been able to do a world of gnawing by midwinter had they been left undisturbed.
 A large amount of circumstantial evidence seems to justify the assumption that birds are killed by spraying trees with arsenical insecticides for the purpose of killing insects. Last year many birds were found dead where trees were sprayed, and an investigation was begun to determine whether the birds were killed by the spraying. The evidence secured was not conclusive enough to clear up the matter fully. It is now time to begin spraying for the gypsy moth and elm-leaf beetle. Dead birds usually may be found within two or three days after spraying has been done.
 "Keep the farm crops on the farm and ship the meat and the butter and the milk and the cheese," is the common sense advice of Secretary Wilson. This insures soil fertility. Every ton of corn shipped to the market loses the farm 33 pounds of nitrogen, 12 pounds of phosphoric acid and seven pounds of potash. Figure this out on the basis of the printed analyses on the fertilizer bags and see how much the farm loses with each corn sale. If fed, eighty or 90 per cent of the constituents go into the manure. By the way, Uncle Jim says to be sure and haul out and spread your manure as fast as made.
 The first five or six years in the life of an orchard may be counted upon as well nigh unproductive. To overcome this some grow a cover crop in sections where the winters are cold, which being a secondary consideration, can be counted on for but a slight return. In the west where the winters are milder, strawberries are grown among the trees and not only serve this purpose where needed, but give generous returns for the use of the land. In the Hood River valley, famed as an apple and strawberry section, the strawberries in the young orchards net the owners all the way from \$200 to \$700 per acre. At the end of five years the trees come into bearing when the numbers of rows may be decreased or the plant entirely removed. Strawberries might well be grown thus in even much colder sections as the plants and covering required to protect them would catch as much snow as would be needed to protect the roots of the trees.

He has never been farther east than Philadelphia, and was there only twice, once during the centennial, and another time a few years later, when he was called to the Superintendent's office on account of a man who was killed on the railroad.

FROST NIPS TOBACCO

Quite Serious Damage in the Eastern Section of the County

Frost on Sunday night did considerable damage to tobacco in sections of the eastern part of the county. The effect was not fully noticeable until yesterday morning and growers could hardly believe their eyes when they saw lowlying portions of their fields turning black, as they had no idea the temperature had been low enough even to cause uneasiness.
 The scope of territory damaged was difficult to ascertain yesterday, but it at least extended into parts of East Lampeter, Paradise, Leacock and Salisbury townships. The damage in some fields could be seen half a mile away, the tops of the leaves of the plants being the color of ripe chestnuts. Such leaves will, of course, fall in pieces and be entirely worthless.

It was a peculiar frost in that some patches were damaged in spots only. The freeze, as a rule, was worst in low grounds, though some of the higher parts were injured also. Places were seen where the plants on a clearing up furrow or wash were ruined while those nearby were uninjured. In some places but the top leaves were nipped; in others both top and bottom leaves, while there were places where but a single leaf neither top nor bottom, were frozen black, the other leaves showing no bad effects whatever.

Old tobacco growers would not believe on Monday that there had been hard enough frost to damage tobacco but yesterday when they looked over the fields, it was apparent that a great deal of injury had been done in spots.

Cutting tobacco is in full swing now, and there is probably well on to half of it housed. Farmers would take the chances on frost in jury if the tobacco was maturing but it is neither growing much nor ripening every day, so that farmers are slashing it off at a great rate to keep it from drying up on the ground and becoming entirely worthless. As it is not a heavy job this year, a great deal of ground can be cleared in a day and if the weather continues as at present, the greater majority of it will be put away this week.

As to frosts in this immediate vicinity we have heard of none thus far.

Young Family Reunion

A family reunion was held at the Fairview Farm, near Florin, on Sunday, Mr. and Mrs. Emanuel Young being the host and hostess. Young and family, Edna, Bessie, Mabel and Clyde; Mr. and Mrs. Frank Young and family, Russell and Katharine; Mr. and Mrs. Ira Young and daughter, Helen of Lancaster; Mr. and Mrs. S. R. Miller, son and daughter, Charles LeRoy and Katharine; Mr. and Mrs. Tillman Gantz, of Elizabethtown; Mr. and Mrs. Harry Young and sons, Harry B. jr., and Oscar; Mr. and Mrs. S. J. Young, son and daughter, Marie E. and John W.; Mr. and Mrs. Benjamin Brown, son and daughter, Emanuel and Elizabeth, and Miss Minnie Young of Florin.

It was the first family reunion of the Young family. Every son and daughter was present with the exception of Mrs. Weaver, as well as the grandchildren and one great grandchild. An elaborate dinner was served and an enjoyable time was had by all. Mr. and Mrs. Young were the recipients of a number of presents, including a purse of money. After lunch the visitors returned to their homes, after spending a most enjoyable time and hoping to see many more reunions spent just as pleasantly.
