and we don't lie about it either as you can see for yourself if you will just take the time to drop in and see the paper printed.

Our prices are as low as anybody's and you all know the kind of posters you get here. We would be pleased to hear from any one having sale.

DENIES THAT BRYAN "COULD DO NO HARM."

Congressman Burke Says Office of President is Infinitely More Powerful Than Congress.

Congressman James Francis Burke of Pittsburgh in an address on "The Powers of the President" says: "The American people can make no greater mistake than to elect Mr. Bryan on the assumption that he can do no harm in the face of an adverse senate. As between the executive and legislative departments of the government, the former has infinitely greater power to rule and ruin than the latter."

"Mr. Taft and Mr. Bryan are wholly different types of men. Each possesses a strong individual character, which would certainly assert itself in the White House. What either of these men would do during a four years' term in the White House is causing as much anxiety among thoughtful Americans as the mere matter of the election alone."

"As a disturber of monies the president is without a rival in the world. Through the agencies under his control he will this year disburse a billion dollars, showing the great things we are doing in addition to the unparalleled list of the world's achievements."

"In view of the fact that during the fifteen years of Bryan leadership the states controlled by his party have decreased from 23 to 12, the number of senators from 48 to 31, the number of representatives in congress from 220 to 164 and in that time the Democratic party was in control of the ground, whereas it is now, as a consequence of his teachings, a hopelessly heterogeneous mass of Populistic elements, the American people can see little prospect of a constructive policy if Mr. Bryan should succeed."

Things Bryan Would Forget. The most important, because the most curiously novel, feature of Mr. Bryan's address is his apotheosis of the party platform. A new doctrine of infallibility is embodied in these sentences at the very beginning of Mr. Bryan's speech:

A platform is binding as to what it omits as well as to what it contains. A platform announces a party's position on the questions which are at issue, and an official is not at liberty to use the authority vested in him to urge personal views which have not been submitted to the voters for their approval.

It is natural that Mr. Bryan should disavow certain "omitted issues," such as free silver, government ownership of railroads, the initiative and referendum, attacks upon the courts and other theories which at times he sanctioned overhastily in the past. But he is unfortunate in his manner of expressing that disavowal.

A party platform is not political holy writ. The American people choose for president a man, not a clerk, to carry out the orders of a convention committee. A platform is not a prophetic code of conduct, but a summary of basic principles, to be altered, amended or enlarged according to the country's needs.—Philadelphia North American.

Union Labor Vote. Hon. William H. Buchanan is one of the leading union men of western New York and in 1907 was the Democratic candidate for assemblyman in Chautauque county. This is what he has to say of the effort of Mr. Bryan to turn the labor vote over to Mr. Bryan: "I am a union labor man, and I want to say further that no man can carry the labor vote into the Democratic camp. I know how union labor men feel in this city, and three-fourths of them will stand by the Republican party because only in that way have they the assurance of freedom from the business disturbance that Mr. Bryan promises for at least four years if he can be elected. We workmen can't earn wages if businessmen are put in office to disturb business and make trouble."

Campaign Funds. "We welcome Mr. Taft to this advanced ground," said Mr. Bryan in one of his numerous interviews since the Denver convention. The ground referred to is Mr. Taft's statement that no campaign contributions would be received from corporations. Mr. Bryan intended to convey the impression that Mr. Taft had come to that determination after the Denver convention. In that the Democratic "peerless one" is not honest. Mr. Taft is a law abiding citizen. Such contributions are unlawful, made so by a law passed by a Republican congress at the instance of a Republican administration of which Judge Taft was a part six months before the Denver convention. Be honest, Mr. Bryan, if you can!

Keeping In the Spotlight. Candidate Chafin, having fallen into the water tank out west and having stopped half a brick with his person at Springfield, will, if he is going to keep in the limelight, have to lose his diamonds or do a buck and wing with Mrs. Nation.—Minneapolis Journal.

Kernology. It is said the Democratic vice presidential candidate is not a vegetarian after all. Kernivorous, eh? Help! Police!—New York Mail.

Not a Wall For Bryan. "Let us have the worst," says the Brooklyn Eagle. That sounds like, though it isn't a declaration for Bryan.—New York Tribune.

Candidate Sherman has been presented with a loving cup. The next thing in order is to present Candidate Kern with a shaving cup.—Omaha Bee.

When you use Fairfield's Blood Tonic and Regulator for Horses only you see a conditioner that produces results, because it is specifically compounded for the horse and the horse alone. It is a personal prescription for that animal that acts directly upon the digestive organs, purifying the blood and increasing vitality and vigor.

AFTER DOCTORS FAILED

Lydia E. Pinkham's Vegetable Compound Cured Her.

Willimantic, Conn.—"For five years I suffered untold agony from female troubles, causing backache, irregularities, dizziness and nervous prostration. It was impossible for me to walk up stairs without stopping on the way. I tried three different doctors and each told me something different. I received no benefit from any of them, but seemed to suffer more. The last doctor said nothing would restore my health. I began taking Lydia E. Pinkham's Vegetable Compound to see what it would do, and am restored to my natural health."—Mrs. ETNA DONOVAN, Box 299, Willimantic, Conn.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration.

For thirty years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills, and suffering women owe it to themselves to at least give this medicine a trial. Proof is abundant that it has cured thousands of others, and why should it not cure you?

THE TREE DOCTOR.

His Method of Treating a Trunk That is Decaying.

When a tree doctor treats a decayed tree he begins by cutting an aperture in the tree large enough to allow him to get at the inside and remove all the decayed wood. This is essential to the success of the operation. When this work has been done the cavity is ready to be filled. The composition used in case of large fillings contains five parts of sand to one part of portland cement, except for the outer part, where these ingredients are used half and half, this outer coating being several inches thick. To hold the cement in place while it is hardening a stout tin or zinc is employed, this being secured to the trunk of limb in a way to preserve the natural shape. The tin is put on in strips, being fastened with round steel nails having a broad head and a small shank. The strips are wide enough to lap over upon the sound wood, and the nails are placed from half an inch to an inch apart, according to the strain imposed.

The first strip of tin is put on at the lower part of the aperture and the cement put in until it reaches nearly to the top of the tin. Then a second strip is put on, lapping over the other two or three inches, and the two nailed together. Then more cement is used, and so on until the cavity is filled, the last strip of tin being bent down while the final application of cement is being puddled into place and the cavity entirely filled, and then it is straightened up and nailed in place. In case of extra large cavities large sheets of tin or sheet iron are nailed on the outside to prevent the tin from bulging out until the cement has hardened, when they can be removed. The smaller the cavity the larger are the strips of tin employed, as the strain is proportionately less. In twenty-four hours the cement will have hardened completely, and the tin may all be removed. This remedy is applied successfully to fruit trees as well as shade trees.—New York Tribune.

It takes strength and vitality to digest food. The harder your horse's food is to digest, the less strength and vitality he will have for other work. Make his food easy to digest by the regular use of Fairfield's Blood Tonic for Horses Only.

For sale by F. H. Baker, Mount Joy; H. C. Greider, Landisville, and D. B. Ebersole, Elizabethtown.

"Had dyspepsia or indigestion for years. No appetite and what I did eat distressed me terribly. Burdock Blood Bitters cured me."—J. H. Walker, Sunbury, Ohio.

Thieves relieved the Misses Bott of five fine large pullets last Friday night.

FEED FAIRFIELD'S BLOOD TONIC FOR HORSE, COW, HOG AND POULTRY.

GREATEST KNOWN BLOOD PURIFIERS

THE working capacity of any horse can be practically doubled by feeding FAIRFIELD'S BLOOD TONIC for HORSES regularly. It exterminates worms, builds up the health and saves feed. The farmer that sowed wheat all over his farm and expected to reap a crop of wheat, oats and corn from the same, would be no more foolish than the man who feeds his horse, cow, hog and poultry from the same package of Condition Powder and expects to get results. The intelligent farmer feeds FAIRFIELD'S, because there is a separate preparation for each kind of animal. The Fairfield preparations are sold under written guarantee by

CARE OF EARTH ROADS.

How Clay Roadbed's Treatment Differs From One Composed of Sand.

On clay roads a thin layer of sand gravel or ashes will prevent the sticking of clay to the roller or to the wheels of vehicles. Clay soils, as a rule, absorb water quite freely and soften when saturated, but water does not pass through them readily. When used alone clay is the least desirable of all road materials, but roads composed of clay may be created with sand or small gravel from which a comparatively hard and compact mass is formed, which is nearly impervious to water. Material of this character found in the natural state commonly known as "hardpan" makes when properly applied a very solid and durable road. In soils composed of a mixture of sand, gravel and clay all that is necessary to make a good road is to crown the surface and keep the ruts and holes filled and the ditches open and free.

While clay alone never makes a good road except in dry weather, sand

TYPICAL CLAY ROAD BEFORE IMPROVEMENT.

alone never makes a good road except in wet. The more the drainage of a sand road is improved the more deplorable becomes its condition. Nothing will ruin one quicker than to dig a ditch on each side and drain all the water away. The best way, therefore, to make such a road firm is to keep it constantly damp. This can be done by planting shade trees along its sides to prevent the evaporation of water or by growing upon the surface of such sand roads a thick turf, preferably Bermuda grass. Roads running through loose sand may be improved by mixing clay with the sand and slightly crowling the surface.

For the temporary improvement of earth or sand roads any strong fibrous substance, especially if it holds moisture, such as refuse of sugar cane or sorghum and even common straw, will be useful. Spent tan bark is sometimes beneficial, and wood fiber in any form is excellent. Enough sand or earth should be thrown over such roads to keep them damp and protect them from catching fire.

Earth is composed of small, irregular fragments which touch each other at points, leaving voids between. When the earth is broken up and pulverized these voids are almost equal in volume to the solid particles, and as a result the earth will absorb almost an equal volume of water. In the building or maintaining of earth roads it is therefore very desirable that these small, irregular particles be pressed and packed into as small a space as possible in order that surplus water may not pass in and destroy the stability of the road. To this end rolling is very beneficial. The work of maintaining dirt roads will be much increased by lack of care in properly rolling the surface.

Grading a Roadbed.

It is simply extraordinary the lack of judgment shown by many who undertake to shape a roadbed. The road allowance in various states covers sixty-six feet. In rounding up the roadbed the earth is sometimes moved toward the center from nearly the entire distance of the width of the road. This means that the ditches for carrying away the water are not distant from the fences that hedge in the highway. The roadbed is entirely too wide, says the American Agriculturist. It cannot be sufficiently rounded toward the center, and as a result water does not run off with sufficient quickness. The temptation to spoil roads by grading them thus is all the stronger since road graders have come into use. The result follows from the comparative quickness with which the earth can be moved by these machines. A distance of forty-two to forty-five feet between the outer edges of the ditches furnishes a roadbed sufficiently wide.

Effect of Good and Bad Roads.

In issuing a call for a state good roads meeting that was held at Louisville on Sept. 17 Governor Augustus E. Wilson of Kentucky said:

"There is nothing which hurts the people more or costs the people more or keeps them back more than bad roads. They make it hard to leave home, hard to get back, hard to haul, hard to visit, hard to get to heaven sometimes. There is nothing that a man can think of that will do more to help the people than good roads, which make it easy to travel, easy to bring goods home, easy to haul your produce and manufactures to market, easy to go to school and church and easy to avoid many bitter thoughts that bad roads cause."

Iceland Out For Fine Roads.

Highway improvement is becoming a live issue in Iceland. It is claimed that with good roads more than 40,000 acres of land could be made profitable for agricultural purposes and that such roads would lead to the development of the rich veins of gold which are known to exist near Reykjavik, the chief seaport.

Fairfield's Blood Tonic for Hogs Only is specifically compounded for that animal and is a positive regulator of the digestion and purifier of the blood. It prevents cholera and all diseases to which swine are subject. For sale by F. H. Baker, Mount Joy; H. C. Greider, Landisville, and D. B. Ebersole, Elizabethtown.

WATT & SHAND WATT & SHAND

New Fall Suits

FOR Women, Misses and Young Girls

Hundreds of the newest Fall Models for Women, Misses and Young Girls are ready today. We want you to see these New Suits. Compare the Cloth, Lining, Tailoring, Style, Fit and Prices.

Style and quality considered, they are the best in the land.

Women's and Misses' Suits, \$10.00 to \$45.00.

Junior Suits, \$7.50 to \$18.50.

Young Girls' Suits. Smart style for early Fall and immediate wear. Of Broadcloth and Worsted, in green, garnet, taupe, navy, etc. Semi-fitted coat. Tailored or military collar. Satin lining. New Kilted or Flare Skirt. Elegant values at \$7.50 to \$12.50.

Women's and Misses' Suits. \$12.50—Smart Suits, of two-tone Worsteds and self-stripe Broadcloth; shawl collar, 36-inch coat; satin reverses, fancy buttons, skirt made with cluster of pleats, Special, \$12.50.

\$16.75—Strictly man-tailored Suit of Broadcloth, Homespun, Cheviots, Mixtures; single and double-breasted coat; 32 to 42 inches long; guaranteed lining; all the latest models of skirts; colors, navy, green, black, garnet, gray, etc.; \$16.75.

At \$25.00—Handsomely tailored Suits of Imported Mannish Worsteds, high-class tailoring; Skinner's satin lining; new flare skirt; Special value at \$25.00.

Long Coats

Big assortment of full length coats in Checks, Broadcloth, Coverts, Serges, etc., at \$7.50, \$10.00 to \$16.50.

Man-Tailored Top Coats for Fall Wear

All lengths, styles and materials for Fall wear: Coverts, Broadcloth, Mixtures, Etc.

Beautiful Suit of Imported Chiffon, Broadcloth in black and navy blue, coat is 45 inches long; man-tailored; Skinner's satin lining; Skirts have the new cluster pleats; a saving of \$10.00 on this suit at \$27.50.

At \$5.50—Coats of fine, All Wool Broadcloth with a rich lustre; large patch pockets, self covered buttons; Special at \$5.50.

\$7.50—Smart Hip length coats, of nobby mixtures, Striped Cheviots, Broadcloth, etc.; Special at \$7.50.
