

Poultry Profits

Depend Upon Having Eggs During the Winter When Prices are Highest

Egg production falls off at this season as the hen is deprived of the egg-making materials contained in her summer diet. She must also utilize the most of her food in keeping her body warm and has very little material to spare for the development of eggs.

Science Makes it Possible

to overcome these adverse conditions and bring Winter egg production up to the summer standard. All that is necessary is to add to the hens regular Winter ration the egg-making chemical elements contained in her summer diet.

FAIRFIELD'S BLOOD TONIC AND EGG PRODUCER

Is a scientific Poultry Powder composed of the elements of which eggs are formed. These are so combined with other elements that tone up the digestive organs and purify the blood that they are immediately assimilated and carried to the Egg Sac of the hen. The hen's egg sac contains the Embryo of all the eggs she will ever lay, and when these Embryos receive proper nourishment they develop and must be produced. Make your hens lay their eggs NOW, by feeding FAIRFIELD'S EGG PRODUCER regularly. It will increase your profits and keep disease from the poultry yard. The small dose makes it inexpensive and it is sold under written guarantee by dealers named in small advertisements on other pages of this paper, who also carry

- Fairfield's Roup Remedy for Poultry
- Fairfield's Lice Killer and Disinfectant
- Fairfield's Blood Tonic for Horses Only
- Fairfield's Milk Producer for Cattle Only
