A. D. S. Malted Milk Helps Frail Babies

If you are having trouble with the baby's food nothing seems to agree with it, you can probably get the child to take A. D. S. Malted Milk, retain it and thrive on it, as it is a carefully made preparation, intended especially for troublesome stomachs of both infants and adults.

It is one of the standard reliable American Druggists Syndicate products, and its use is unhesitatingly advised by the entire 12,000 druggists who are A. D. S. members, and know its true value. There is nothing in it to prove harmful to the baby—no drugs or medicines. It is merely a scientific made article of food which you can rely upon.

People who have given A. D. S. Malted Milk to their babies are great believers in its virtue.

Insufficient nourishment, because of milk that doesn't agree with the baby, frequently brings grief to the hearts of fond parents by the loss of their loved ones.

Old Aunt Cloe, a baby's colored nurse, known in many of the best families of Indianapolis, recently was engaged to take charge of a sickly, peevish, run-down, half-starved infant, and the minute she saw the baby, she remarked: "You-all is starvin dat chile; she's hungry—dats all."

The doctor was called and he prescribed A. D. S. Malted Milk—and here is a copy of a letter the baby's father wrote two months later:

Dear Sirs—Here is a story which should not only interest you, but all fond parents. Our baby had been failing for weeks and lost weight steadily. One day an old colored woman Aunt Cloe, suggested that a change of food might benefit the baby, as it seemed to be insufficiently nourished, and acting upon our doctor's advice we decided to try A. D. S. Malted Milk, instead of the mother's milk. As a result the baby commenced to gain at once—and at the end of a month, when her picture was taken she looked and acted like a different baby. Can you beat it?

Yours sincerely,
C. E. LAMBERTON.
