CONCRETE BUILDINGS, PAVEMENTS AND ORNAMENTAL WORK

The lesson of growth teaches us that the world is coming to recognize Concrete Building Block as best building material today. The U. S. and Canada, and all the foreign countries as well as the leading engineers recommend it. The great railroads have adopted it. The best builders advise its use in preference to any other material for its great strength. A house will look better and last longer at a small cost of construction and keep in repair better than any other structure ever built. They are warmer in winter and cooler in summer. It is Fire Proof, Water Proof, and Frost proof. I want every person who contemplates building here or elsewhere, to communicate with me. I am prepared to furnish complete all styles of buildings. If I can't thoroughly convince you as to the Practicability, Durability and Economy of my product there is no harm done and you haven't spent a cent. Yours for business.

A neighboring woman has again demonstrated that a cat has more lives than one. She discovered a marauder in her chick house, proceeded to maul it with a crowbar, flung it against the building, and then jumped on it to crush the feline's life but it evanesced without displaying any damage to its locomotive powers. Whether the cat's appetite for spring chickens has been materially diminished or not does not appear.
