LIFE NOT WORTH LIVING
is the way Miss Alta Abel of West Baden, Ind., summed up her existence after having sought in vain for health. She writes: "I was a complete wreck—always tired, worn out and nervous. I had to spend about one-third of my time in bed."
"Vinol, your delicious cod liver and iron tonic, was recommended, and I can truly say it has done me more good than all the medicine I ever took in my life. That nervous and tired feeling is all gone. I have gained in health, flesh and strength, until I feel like another person." (We guarantee this testimonial to be genuine.)
What Vinol did for Miss Abel, we know it will do for every nervous, run-down, overworked, tired, thin and discouraged woman in this vicinity.
Try a bottle of Vinol with the understanding that your money will be returned if it does not help you.

Electric Bitters
Made A New Man Of Him.
"I was suffering from pain in my stomach, head and back," writes H. T. Alston, Raleigh, N. C., "and my liver and kidneys did not work right, but four bottles of Electric Bitters made me feel like a new man."
PRICE 50 CTS. AT ALL DRUG STORES.

For Rent
From September 15, a large stone mill property recently occupied by the New Standard Hardware Works, three floors and attic, good water power with two turbine wheels, would make a suitable tobacco warehouse, storage house or machine shop. Apply to S. R. Snyder, Mt.

A Poor Weak Woman
As she is termed, will endure bravely and patiently agonies which a strong man would give way under. The fact is women are more patient than they ought to be under such troubles.
Every woman ought to know that she may obtain the most experienced medical advice free of charge and in absolute confidence and privacy by writing to the World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y. Dr. Pierce has been chief consulting physician of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y., for many years and has had a wider practical experience in the treatment of women's diseases than any other physician in this country. His medicines are world-famous for their astonishing efficacy.
The most perfect remedy ever devised for weak and delicate women is Dr. Pierce's Favorite Prescription.
IT MAKES WEAK WOMEN STRONG.
SICK WOMEN WELL.
The many and varied symptoms of women's peculiar ailments are fully set forth in Plain English in the People's Medical Adviser (1008 pages), a newly revised and up-to-date Edition of which, cloth-bound, will be mailed free on receipt of 31 one-cent stamps to pay cost of mailing only. Address as above.

POULTRY
GOOD HOUSE FOR CHICKENS
There is No Need of Elaborate Structure, but It Should Be Dry and Free From Draughts.
In describing what he deems the best house for chickens, Mr. Glenn T. Sponenberg of Oswego county, New York, writes the Farm and Home as follows:
Front Elevation and Floor Plan.

If concrete is used in the construction of the foundation and floor it will make a rat and water-proof floor that is sanitary and easily cleaned. The rest of the house should be built of wood, as the forms for concrete would cost nearly as much as the siding itself. The frame is 2x4-inch material and the siding and roof boards of yellow pine surfaced both sides. If the sides are covered with roofing paper, it makes a tight and very warm house. The roof should be covered with some good roofing laid according to directions so as to make it as tight as possible. Shingles are not suitable for a building of this kind, as the roof is apt to be damp most of the time. The curtain front house is the driest and most easily regulated in accordance with the weather. It is cheaper to build, is more easily cleaned and the floor space is more fully utilized than in the scratching-shed type. This house should be built tight so that the ventilation is from the south, therefore no drafts. With the scratching-shed house the roosting room is almost always sure to be damp. But by removing the partition this is eliminated and healthier hens are the result. If any one doubts that a flock of hens stir up much dust just let him stand on the front side of a curtain front house when they are fed. Open the curtain and when he sees the cloud of dust they raise I believe he will think fowls need more ventilation.
A shed roof is best, as it is easier to build, provides greater volume of sunlight and has no peak to become filled with cobwebs. The pens should be deep rather than long and shallow. This places the sunlight on the floor instead of on the back wall, therefore a dried floor and happier hens. The pens should be large enough to accommodate 50 hens and two or more cocks. One 20 feet deep and 12 feet wide will furnish the required floor space.
The accompanying plans of side and front elevations and floor arrangement illustrate what I think is the best house. This contains pens 12x20 feet, the front being 8 1/2 feet and the back 5 feet high. This is as high as is necessary to build and as low as is easy to work in. The front contains, to each pen, one double sash window with the upper sash hinged at the top. This is opened when too cold or stormy to raise the curtain. A frame 5x5 feet, with the top hinged to swing in, is covered with muslin or cheesecloth. On the outside of this opening is tacked woven wire to keep the fowls in while curtain is open during the day, except during a hard storm and in very cold weather.
The platform under the roof is 2 1/4 feet from the floor, and the nests are the same height, being entered from the platform. This leaves nearly all the floor space available to the hens, and every nook and corner is cleaned with ease. The roosts are 2x2-inch material rounded at the top. For a

DANGER PERIOD OF WOMAN'S LIFE FROM 45 to 50
Interesting Experience of Two Women—Their Statements Worth Reading.

Asheville, N. C.—"I suffered for years with female trouble while going through the Change of Life. I tried a local physician for a couple of years without any substantial benefit. Finally after repeated suggestions to try Lydia E. Pinkham's Vegetable Compound, I quit my physician and commenced using it with the happiest results. I am today practically a well woman and anxious to contribute my mite towards inducing others to try your great medicine, as I am fully persuaded that it will cure the ailments from which I suffered if given a fair chance.
"If you think this letter will contribute anything towards further introducing your medicines to afflicted women who are passing through this trying period, it is with great pleasure I consent to its publication."—Mrs. JULIA A. MOORE, 17 East St., Asheville, N. C.
The Case of Mrs. Kirlin.
Circleville, Ohio.—"I can truthfully say that I never had anything do me so much good during Change of Life as Lydia E. Pinkham's Vegetable Compound.
"Before I had taken one half a bottle of it I began to feel better, and I have continued taking it. My health is better than it has been for several years. If all women would take it they would escape untold pain and misery at this time of life."—Mrs. ALICE KIRLIN, 358 W. Mill St., Circleville, Ohio.
The Change of Life is one of the most critical periods of a woman's existence. At such times women may rely upon Lydia E. Pinkham's Vegetable Compound.

WORKING HOURS OF WOMEN
Several States Have Passed Laws Limiting Them to Sixty Hours or Less a Week.
During their last session the legislatures of several states passed new laws regulating the number of working hours for women. South Carolina passed a law limiting them to 60 per week in mercantile houses and the textile mills, of which there are so many in the state.
In Ohio an Massachusetts a 54-hour bill has been enacted. The Ohio bill applies to everything excepting hotels and mercantile establishments. Utah and Missouri have also passed nine-hour laws, says Health Culture. The ten-hour law which the legislature of Illinois enacted in 1909 is enlarged so as to include practically every kind of establishment where women are employed.
Wisconsin has established a 55-hour week, excepting night work, which is less. Minnesota has strengthened its ten-hour law by extending the penalty for violation so as to include manufacturing and mechanical establishments. The states of Washington and California have passed eight-hour day laws for women. The law of Washington applies to the usual mercantile and mechanical establishments, restaurants, hotels and laundries, but the California act applies also to telegraph, telephone, express and transportation offices.

Critical Moment.
At the beginning of the Civil war men who knew little about military tactics were sometimes temporarily in command of small bodies of the troops which looked into Washington, and it is said the Senator Henry Wilson of Massachusetts, afterward vice-president of the United States, was for a time assigned to the captaincy of a company of recruits from his native state. He assisted in drilling them to the best of his ability, but one afternoon, as he marched at their head up Pennsylvania avenue, he met his Waterloo. He had been getting along very well and was beginning to feel quite proud of the proficiency of his men, when he suddenly realized that the coping and fence extending south from the treasury building was right in his forward path. He could not think of the order which would swing his command into Fifteenth street, and thereby avoid the obstacle. Nearer and nearer the company approached; the men were almost upon his heels, when in desperation he shouted: "Come round like a gate!" and the situation was saved.

Condition of Laying Hens.
A hen in the best laying condition has some surplus fat on her body. This means that her bodily wants have been supplied, and there is some to spare. A very fat hen seldom lays well; a poor hen cannot lay well. The first part of the egg which is made is the yolk, which contains 30 per cent. of albumen and 64 per cent. fat. New growth and egg production only come from the surplus food not needed to keep the body. Corn is an excellent grain, but is so polished by the fowls that are liable to overeat. Wheat, with its by-products, is the most useful grain to the poultryman.
Hard Runs Bad.
Keeping fowls on hard runs will frequently cause swollen feet and legs. They must have some loose ground to scratch over.
Garnets for Sandpaper.
Grandpa recollects when the garnet, a simple and lovely stone, was regarded as precious and worn generally in beautiful old-fashioned jewelry. Grandpa's attire was not complete without the big breast-pin, ring or earrings which her daughters then were glad to borrow and finally to inherit. Now the garnet has become so common and non-precious there is none to do it honor, and it is ground into fine powder for the making of high-class sandpaper.

Remodeled Enlarged
I have just remodeled and enlarged my place of business, have installed large floor show cases, in which to display stock and now have awaiting your inspection one of the finest lines of
Watches, Clocks and Jewelry
to be found anywhere. Call and see me and be convinced that what I say is true.

(Bargain Section).

Side Elevation Mr. Sponenberg's House.
breeding house I would make the pens 12 feet deep and 8 feet wide, which would hold as many hens as are desired with one cock, but for a laying house the larger size is the better and more economical.
