WOMAN SICK TWELVE YEARS

**Wants Other Women to Know
How She Was Finally
Restored to Health.**

Louisiana, Mo.:—"I think a woman naturally dislikes

known to the public, but complete restoration to health means so much to me that I cannot keep from telling mine for the sake of other suffering women. "I had been sick about twelve years, and had eleven doctors. I had dragging down pains, pains at monthly periods, bilious spells, and was getting worse all the time. I would hardly get over one spell when I would be sick again. No tongue can tell what I suffered from cramps, and at times I could hardly walk. The doctors said I might die at one of those times, but I took Lydia E. Pinkham's Vegetable Compound and got better right away. Your valuable medicine is worth more than mountains of gold to suffering women."—Mrs. BERTHA MUFF, 503 N. 4th Street, Louisiana, Mo.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and to-day holds the record of being the most successful remedy for female ills we know of, and thousands of voluntary testimonials on file in the Pinkham laboratory at Lynn, Mass., seem to prove this fact.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

The choir of the U. B. church had a pleasant surprise last Friday evening when a kind friend invited them to McGil's ice cream parlors where they were treated to cream.

STOMACH TROUBLES

Cured By Vinol—Here is Proof
Seymour, Ind.:—"I was troubled with a chronic stomach trouble, and five weeks ago it got so bad I had to give up work. I had tried various medicines without relief, and was finally induced to try Vinol. After taking the first bottle I was greatly benefited. Am now on the third bottle and ready to resume work. Am rapidly gaining in weight and strength." Edw. Niemman.

It is the curative medicinal elements of the cod's livers, combined with the strengthening properties of tonic iron contained in Vinol which makes it so successful in restoring perfect digestion and at the same time it builds up the tired, overworked and run-down system.

Try a bottle of Vinol with the understanding that your money will be returned if it does not help you.

SCHOLARSHIPS FOR TEACHERS AT U. OF P. SUMMER SCHOOL

Term Begins July 1st—Dormitories and Swimming Pool Open to Women.

In line with the general policy recently announced by the President of the University of Pennsylvania to serve the people of the State in every possible way, the Summer School has added a number of features which make it more helpful and accessible than ever before for students in general and teachers in particular. Courses leading to the usual college degrees and others specially planned to improve the everyday work of the public school have been provided in profusion. For particular phases of this work, the Pennsylvania Congress of Mothers and the Woman's Christian Temperance Union are offering free scholarships.

During the term beginning July 1st and ending August 10th, certain of the University Dormitories are reserved for women. The swimming pool is also open to them for an hour each day, and opportunity is afforded for every form of physical education. A special booklet has been issued calling attention to the numerous places of historical interest which will be visited during the session and to the excursions arranged to Willow Grove Park, Atlantic City, League Island Navy Yard and many other recreation points, to say nothing of a moonlight ride on the Delaware. There are free lectures, receptions and dances for almost every evening of the six weeks' term. Special provision is made for teachers wishing to earn the higher grades of certificates made necessary by the new Pennsylvania Code.

A great School of Observation gives elementary school teachers, principals and superintendents the opportunity to study, through daily visits to model teachers in each school grade, the work of such model systems as Indianapolis, St. Louis, Philadelphia, Passaic, N. J., Newton, Mass., and of the Horace Mann School, the model school for Columbia University. The school systems selected for representation are among the most noted in America. The teachers who represent them have been officially chosen. For example, the seventh grade is in charge of Miss Black, of Indianapolis who was recommended two years ago by Hon. Calvin S. Kendall, now Commissioner of Education of New Jersey but then Superintendent of Indianapolis Schools. Miss Bryan has been selected to show how sixth grade work is done in St. Louis, after conference with the Board of Superintendents and the St. Louis Teachers' College authorities. Miss Lewis, who gives third grade work in the model school of Teachers' College, Columbia University, also lectures on Primary School Methods.

Students registering for observation are required to take an hour's work each morning in the grades which most interest them, and at the close of the session have a half hour of conference with model teachers and an hour of discussion of elementary school problems, participated in by teachers coming from every part of the country and representing every grade of position and every type of school.

In addition, Professor Yocum and Mr. Subie offer courses which apply the most recent results of educational research to methods of teaching the common school branches. A more complete course of study from that principals and superintendents can select what they most need has rarely been offered by any institution in America.

The courses in Psychology, for which the University is famous, are attracting even more general attention than usual this year. Dr. Witmer personally conducts his clinic for defectives and supervises classes for backward children in charge of teachers who regularly assist Miss Farrell, of New York. The fact that New Jersey requires the formation of special classes for defective children will cause increased attendance from that state, but experts in the teaching and supervision of backward children are registering from all over the country. There are courses in kindergarten, drawing, manual training, the teaching and supervision of public school music, school playground teaching and supervision, medical inspection and moral hygiene, to say nothing of work in every specialty needed by high school and normal school teachers and courses for architects and applicants for admission to medical schools.

Growing interest in school libraries makes the course in Library Economy especially helpful. It will be under the direction of Miss Donnelly, head of the Library School of Drexel Institute, and includes courses in Cataloging, Classification, Reference and Bibliography, Library Economy, Children's Literature and How to Use a Library. The work in Physical Education is more manly than ever, and embraces school playground supervision, besides a two year course in Physical Education for teachers of gymnastics and physical education and supervisors of athletics.

In short, at every point, the Summer School bears evidence of the University's wish to help public school teachers. Many thousands of general and special circulars are being issued by Dr. A. Duncan Yocum, the Director. Last year the attendance was seven hundred; this summer provision is being made for over a thousand students.

Accepted Challenge

Charles Pike, of Elizabethtown, has accepted the challenge of Chas. Flickner, of Allentown, for a pretzel making contest for a purse of \$200.

Japan has accepted the invitation to participate in the Panama Pacific exposition in 1915. This will be a bitter blow to Richmond Pearson Hobson, who will have to postpone his Japanese war another three years.

What the "B. T. Babbitt" Years of Know How Mean To You.

If you have ever been a "home soap maker," you realize that *experience*—the *know how* knack of mixing, boiling, cooling—is the one big factor in producing a clean soap.

Before most present-day soaps were even known, B. T. Babbitt's Best Soap and other Babbitt Products had become household names.

Couple such *expertness* with honest methods and modern science, and you touch the very heart of the world-wide popularity of

B. T. BABBITT'S Soaps and Cleansing Products.

Back in 1836 B. T. Babbitt operated his first small soap boiler, and even with crude methods produced a soap that proved a revelation to the good housewives.

To-day there are twelve immense buildings (covering 81 acres at Babbitt, N. J.), employing an army of skilled soap makers and a staff of expert chemists.

Here are installed Mechanical Devices of Almost-Human Accomplishment, with exclusive processes that place soap making nearer perfection than it has been for centuries past.

And, thanks to science, the cost of production has been so lowered that the

Prices Remain Unchanged,

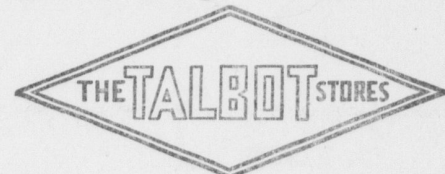

despite the fact that raw materials cost double and treble what they did 76 years ago.

When You Use B. T. Babbitt's Best Soap, 1776 Washing Powder, Lye or Potash, White Floating Soap, Naptha Soap, or Babbitt's Cleanser you will find that B. T. Babbitt's experience is invaluable to you.

**Save Babbitt Trademarks for the Most Valuable
Premiums Offered To-day.**

B. T. Babbitt was the pioneer in coupling up "good-will" premiums with soap of 100% quality. To-day users of *all* Babbitt's products can exchange Babbitt Trademarks and secure choice from thousands of premiums.

Or Bring Them To

Where They Are As Good As Cash.

Either to exchange them in the Special B. T. Babbitt Premium Dept., or purchase what you want in the Talbot Store, according to the listed value. Bring Trademarks or wrappers in packages of ten each.
