

# Underwear Underwear

We have gathered from the largest Manufacturers, the cream of this season's production and are offering to the trade values not to be found elsewhere, as to price, quality and particularly as to fit.

As a perfect fitting dress is impossible over poorly fitted undergarments.

Ladies' "Setenug" Union Suits at \$1.00  
 Ladies' "Cumfy" Union Suits at 50c  
 Ladies' Union Suits at 25c  
 Ladies' "Cumfy" Vests, can't slip off shoulders, at 12c and 15c  
 Ladies' Strap or wing vests, at 10 and 12c  
 Ladies' fine gauze, long or short sleeve vests, 25c  
 Children's Union Suits, 25c  
 Children's Union Suits of fine combed yarns, all taped, at 50c  
 Children's Vest and Pants, high neck, long or short sleeves, 10c to 25c  
 Children's fine gauze vests, strapped, at 10c  
 Infants Wrappers at 10c  
 Infants Wrappers at 5c

## Men's Underwear

The most difficult problem is to secure a garment to retail at 25c on account of the high price of cotton. We believe we have the best to be had in either long or short sleeves, full size, drawers reinforced seat, and no seconds.

At 50c we offer the Williams Bros. make fine Egyptian yarn, shirts long or short sleeve, drawers reinforced seat and extension band at waist line.

The Imperial Union suit has come to stay. The most perfect fitting garment on the market. Short sleeve, 3-4 length, drop-seat. We show two qualities, \$1.00 and \$1.50 per suit.

Athletic underwear, showing up better each season, made of fine cloth. Not as clinging as the balbriggan and cooler. All sizes, in two qualities, 25 and 50c.

Boys' Balbriggan Underwear, short sleeve shirts, knee length drawers, at 25c a garment.

## Special For Friday and Saturday

We have secured an assortment of Glass Berry dishes. 6 different patterns, highly polished, would be cheap at 15c. Special at 10c.

## June Sale of Cotton Dress Fabrics at Severe Reductions

WEATHER conditions were very backward this spring—winter held on 'til 'twas time for summer to set in. As a result, the demand for summer dress fabrics was somewhat delayed, hence we are determined to reduce our stock immediately.

"Tag end" sales at the close of the season are common but genuine reduction sales of this character right at the beginning of the summer are indeed out of the ordinary.

# "What Kind of Place is a Store Built on An Ideal?" You Ask!

Bricks, mortar, stock and salespeople constitute a store, or shop, in the public mind. You seek to buy—they to sell.

Commonplace, isn't it?

But there is a surprise awaiting you at

the institution founded on an ideal. The ideal is briefly this: Give the Customer always an honest dollar value for every dollar spent—but more! Give value plus—in service, in comfort while shopping, in convenience, in catering to the interests of the community.

Whether you purchase a 5c glass of soda, or a \$1.00 article—or whether you never place a penny in our coffers—we are happy to see you utilize the Talbot Store to the limit.

Check your packages, at our expense, in the Check Room. Or even check your children with the attendant in charge of our "Frolicland" playground.

Spend a quiet hour in the cozy rest rooms. Attend to your correspondence in the writing rooms.

Don't wait outside for a friend. It is more pleasant to step inside. And no one will ask you to buy.

We want you to feel as much at ease in the Talbot Store as in your own home—and as free to avail yourself of its facilities as you would any public place.

We Want Your Patronage but we Want the Warmth of Your Goodwill More!

At 5c, 10c, 25c, 50c and \$1.00 Almost Everything—for Home or Person

We draw on the World's resources in assembling this assortment. You have but to ask for what you want. We'll not disappoint you.

### USEFUL INFORMATION FOR THE FARMER

The Raising of Colts Profitable—The Fertilizing of Soil—The Rearing of Sheep Profitable—A Number of Other Interesting Live Stock Notes

Never rush a horse on a down grade. This is one of the first causes of sprung knees and strained tendons.

For fattening sheep feed liberally of oat straw and about three pounds corn fodder daily for 100-pound sheep.

On his early training entirely depends a colt's usefulness and value as a horse, and it should begin the day it is foaled.

A horse or colt will drive better upon a two-thirds ration of hay and one-third of straw than upon a full ration of hay alone.

If you are not working your horse be sure to turn them, as well as the colts, out where they will get plenty of exercise and good fresh air.

When the plow horses are brought in at noon the harness should be removed and the shoulders washed and rubbed dry while they are feeding.

Do not be afraid to shoot any prowling stray dog that may be found on your farm and particularly if it should happen to be in the vicinity of the sheep.

All hogs do not equally utilize the feed consumed in the production of pork. Some make more pork than others from the same amount of food. The better the hog the less the feed costs in the production of a pound of pork.

Sheep rearing has been one of man's most profitable and important occupations since the very early times, but it is not known whether the present breeds of sheep had their origin in the wild species now extinct. It is only in comparatively recent years that general attempts have been made to improve the known breeds of sheep, and in making such improvement the farmers of America have devoted their principal attention to the fleece while those of Canada and Britain pay more attention to carcass.

acting dean of College of Agriculture. Ohio State restoration of the soil fertility, according to Prof. Vivian, is organic matter. The destruction of organic matter by cultivation and otherwise, is largely responsible for the depletion of our soils, said he. "This organic matter must be restored if we expect our farms to be productive. What does organic matter do? It increases the power of the soil to absorb and retain moisture, improves the physical or mechanical condition of the soil and is a storehouse of plant food. How can organic matters be restored to the soil? By saving all animal manures and putting them onto the land; by making use of all crop residues, that is putting back into the soil everything not used for feed by turning under green manuring and catch crops. Prof. Vivian pointed out the loss sustained by burning straw stacks and other crop residues and declared that the difference between the careful saving of this plant food and its wanton destruction was the difference between the salvation and damnation of our soils.

In spite of the electric car, the automobile and other motive power horses have increased in price commensurate with other farm animals. Every farmer should have a number of horses growing and coming on for home use and for sale. A colt can be grown as easily and cheaply as a calf, and at the same time the mare which mothers it will make a half team for general farm work. The writer has a team of young mares of the same size and age. During the past season one of them reared a colt now worth at least \$75, while the other mare working by her side has reared none. The mare with the colt has done exactly the same work as the mare which has no colt and now at the close of the early summer's work she is in as good condition as her mate, with both on the same feed and care. A colt, of course, is some bother and consumes some feed. The same is true in growing any domestic animals. But with a little patience in the handling of the mare and foal, a mare doing general farm work should raise two colts every year and do about as well as none. The colt will represent at least 100 per cent profit, money and labor invested in it.

be grown without noticing the feed it consumes.

## LEBANON VALLEY FARMS FOR SALE & EXCHANGE

Any Size, Location or Description

Lancaster County people who bought farms through me last Fall were offered profits of \$1,000 to \$1,500 before they had their deeds.

The easiest sales are made to the best judges of land, and those who have a good general knowledge of values.

One of my recent sales was a 140-acre farm at a price of \$9000 to a Chicago man, a graduate of an Illinois Agricultural School, who has traveled extensively all over the world.

If you want to buy a farm for farming, speculation, or investment, write to me.

I can give you the best references both in Lebanon and Lancaster counties and can easily show you that you can deal safely and profitably.

Many of the farms will increase 50 per cent. in the next few years. The best bargains will go to early buyers.

Write at once for list and make an appointment to see the farm while the crops are growing.
